Cisco Cloud Control
Black Belt Stage 1 Learning Maps

Sales (Business Seller) · Pre-Sales (Technical Seller) · September 2026

Joel Jose (joeljos@cisco.com), Dave Liebman (dliebman@cisco.com)

Sales Stage 1 overview

- Black Belt Cisco Cloud Control Sales Stage 1 (Sep 2026)
- Cisco Cloud Control-Sales-Stage 1 · 88 min · 9 modules · 4 shared
- A Business Seller can open on operating capacity, tell the Cloud Control story in 30 seconds / 3 minutes / 30 minutes, handle packaging and adjacency, and leave a next step on one of the four money plays.
- Modules
- S1 Why AgenticOps, why now (8 min) [Shared]
- S2 What is Cisco Cloud Control (10 min) [Shared]
- S3 AI Canvas — the customer story (12 min) [Shared]
- S4 Packaging, entitlement, no new license (8 min) [Shared]
- S5 The power of one — capability tour (12 min)
- S6 Studio and Marketplace — partner IP (8 min)
- S7 Adjacency — Assistant, IQ, and Splunk (8 min)
- S8 Four money plays — what's in it for partners (12 min)
- S9 Pitch practice — 30 seconds, 3 minutes, 30 minutes (10 min)
- Assessment: 10-question knowledge check, 80% pass

Sales Stage 1 · S1–S3

ID	Module	Min	Learning objectives	Source files
S1	Why AgenticOps, why now · Shared	8 min	• Open on operating capacity, not consoles: more work than headcount, and partners already paid the coordination tax • State GA facts: U.S. GA 25 Aug 2026, 300+ customers in production, 5,000+ waitlist — this is a deployment conversation • Position AgenticOps as the operating model and Cloud Control as the operational harness with human accountability	Partner Summit - Cisco Cloud Control Executive Brief.pdf (Beat 1) BDM - Cisco Cloud Control & AI Canvas.Pdf(slides 2–4) Cisco Live Keynote Transcript(KN1 00:00:00–00:07:20) Specialist Master Transcript(MC1 00:00:00–00:12:00)
S2	What is Cisco Cloud Control · Shared	10 min	• Draw the three-layer commercial story: Cloud Control / AI Canvas / Studio + Marketplace • Name the seven-layer operating model and land Platform Services, Canvas, and Studio on stage • Handle the replacement objection: Cloud Control connects work between controllers; it does not flatten Meraki, Intersight, or Nexus expertise	Partner Summit - Cisco Cloud Control Executive Brief.pdf (Beat 2) BDM - Cisco Cloud Control & AI Canvas.Pdf(slides 5–7, 37) TDM - Cisco Cloud Control & AI Canvas.Pdf(slides 5–8) Cisco Live Keynote Transcript(KN1 00:04:00–00:07:20) AI Canvas Transcript(DD1 00:00:00–00:10:00) Specialist Master Transcript(MC2 00:12:00–00:20:30)
S3	AI Canvas — the customer story · Shared	12 min	• Tell the 'why is my application so slow?' story: symptom anywhere, answer in one workspace • Describe multiplayer, supervisor + domain agents, and human approval before action • Know when to stay in Assistant (seconds) vs open Canvas (minutes to hours)	BDM - Cisco Cloud Control & AI Canvas.Pdf(slides 14–20, 30) Cisco Live Keynote Transcript(KN3–KN4 00:16:00–00:36:30) Specialist Master Transcript(MC4 00:28:30–00:38:00) Cloud Control Partner Enablement Plan.pdf (p. 12)

Sales Stage 1 · S4–S6

ID	Module	Min	Learning objectives	Source files
S4	Packaging, entitlement, no new license · Shared	8 min	• State: included in Essential and Advantage tiers of eligible subscriptions — no new license, no margin on the platform itself, by design • Price services against the six-stage adoption lifecycle: Onboard, Implement, Use, Engage, Adopt, Optimize • Flag that base usage is included today and monetization, pricing, packaging, and rate limits may change	Partner Summit - Cisco Cloud Control Executive Brief.pdf (Beat 4) BDM - Cisco Cloud Control & AI Canvas.Pdf(slides 25, 36) TDM - Cisco Cloud Control & AI Canvas.Pdf(slides 53, 55) Cloud Control Partner Enablement Plan.pdf (p. 9)
S5	The power of one — capability tour	12 min	• Walk a buyer through one login, unified inventory, connected topology, correlated Actions, Assistant, and Workflows • Connect each capability to a business outcome (faster MTTR, less swivel-chair, reuse of existing Cisco spend) • Keep the tour commercial: what the customer sees, not how the pipeline works	BDM - Cisco Cloud Control & AI Canvas.Pdf(slides 8–13) Cisco Live Keynote Transcript(KN2 00:07:20–00:16:00)
S6	Studio and Marketplace — partner IP	8 min	• Explain Studio (App Builder + Agent Builder) as the partner differentiation layer — awareness only in Stage 1 • Position Marketplace as services on the platform today and the path to publish partner IP later • Name sellable services from the A2 taxonomy: domain agents, workflow packs, integration apps, design services	BDM - Cisco Cloud Control & AI Canvas.Pdf(slides 21–24) Partner Summit - Cisco Cloud Control Executive Brief.pdf (Beat 3 play 4 + Annex A2) Cisco Live Keynote Transcript(KN5 00:36:30–00:43:03) Cloud Control Partner Enablement Plan.pdf (pp. 14–15, 47)

Sales Stage 1 · S7–S9

ID	Module	Min	Learning objectives	Source files
S7	Adjacency — Assistant, IQ, and Splunk	8 min	· Differentiate AI Canvas vs AI Assistant (workspace vs chat, multiplayer vs private) · Position Cloud Control vs IQ as complementary: live ops vs lifecycle/risk; same asset truth · Position AI Canvas + Splunk: Canvas coordinates; Splunk deepens historical analysis	BDM - Cisco Cloud Control & AI Canvas.Pdf(slides 30–34) TDM - Cisco Cloud Control & AI Canvas.Pdf(slides 60–64)
S8	Four money plays — what's in it for partners	12 min	· Lead the unified operations conversation (boardroom, not BOM) · Drive pull-through: expand, displace, accelerate the second and third product; value compounds with each connected product · Build services around agentic operations: Canvas = resolution; Studio = build (domain agents, workflow packs, integration apps, design) · Extend value through Marketplace: services today, publish IP over time — resale to co-creation	Partner Summit - Cisco Cloud Control Executive Brief.pdf (Beat 3 + Annex A2) Cloud Control Partner Enablement Plan.pdf (pp. 10–12, 15) BDM - Cisco Cloud Control & AI Canvas.Pdf(slide 26) Specialist Master Transcript(MC5 00:38:00–00:47:37)
S9	Pitch practice — 30 seconds, 3 minutes, 30 minutes	10 min	· Deliver a 30-second elevator using: AgenticOps is the model; Cloud Control is the harness · Close with the five asks: qualify and bring to Sales; enable the unified narrative; land 2nd/3rd product; one Studio play; bring a use case · Use two proof points (prefer NTT DATA in a partner room; AMD if they want a named customer) and never end on caveats	Partner Summit - Cisco Cloud Control Executive Brief.pdf (Beats 6, 8, 9) BDM - Cisco Cloud Control & AI Canvas.Pdf(slides 2–27)

Pre-Sales Stage 1 overview

- Black Belt Cisco Cloud Control Pre-Sales Stage 1 (Sep 2026)
- Cisco Cloud Control-Pre-Sales-Stage 1 · 128 min · 13 modules · 4 shared
- A Technical Seller can white-board the platform architecture, qualify identity/tenancy/integration prerequisites, narrate a multi-agent Canvas investigation, run the dCloud AgenticOps in Action path, and avoid overselling Studio or uncommitted integrations.
- Modules
- P1 Why AgenticOps, why now (8 min) [Shared]
- P2 What is Cisco Cloud Control (10 min) [Shared]
- P3 AI Canvas — the customer story (12 min) [Shared]
- P4 Packaging, entitlement, no new license (8 min) [Shared]
- P5 Architecture, identity, RBAC, and tenancy (10 min)
- P6 Inventory, insights, and topology (10 min)
- P7 Actions, Assistant, and workflows (10 min)
- P8 Multi-agent investigation, MCP, and A2A (12 min)
- P9 Working in Canvas — modes, widgets, knowledge base, boards (12 min)
- P10 Integration coverage and customer prerequisites (8 min)
- P11 Studio apps, agents and lifecycle (10 min)
- P12 Agent security, observability and trust (8 min)
- P13 dCloud demo orientation (10 min)
- Assessment: 15-question knowledge check, 80% pass, plus a demo-orientation checklist

Pre-Sales Stage 1 · P10–P12

ID	Module	Min	Learning objectives	Source files
P10	Integration coverage and customer prerequisites	8 min	• Quote the GA connected-product set from the Partner Summit brief (Meraki through IQ, including via-Meraki GO and via-controller paths) • Name live third-party today: ServiceNow, BlueCat, Infoblox, Atlassian — plus 60+ integration commitments • Confirm the customer's connected products with Sales before you demo; Marketplace logos are not the integration list	Partner Summit - Cisco Cloud Control Executive Brief.pdf (Beat 3 + Beat 8) TDM - Cisco Cloud Control & AI Canvas.Pdf(slides 37, 50, 65–66) BDM - Cisco Cloud Control & AI Canvas.Pdf(slide 20) Cloud Control Partner Enablement Plan.pdf (p. 11)
P11	Studio apps, agents and lifecycle	10 min	• Describe App Builder (Codex builds the view) and Agent Builder (skills, schedule/event triggers, monitor) • Walk create to validate to publish (immutable version) to install with customer settings to manage as one unit • Give the four example apps and Cisco-built Marketplace apps as roadmap-flagged	TDM - Cisco Cloud Control & AI Canvas.Pdf(slides 38–47) BDM - Cisco Cloud Control & AI Canvas.Pdf(slides 21–24) AI Canvas Transcript(DD6 00:52:00–00:57:04) Cloud Control Partner Enablement Plan.pdf (p. 47)
P12	Agent security, observability and trust	8 min	• Map AI Defense across the agent lifecycle: MCP scanner, config scanner, skill scanner, runtime protection • Describe Splunk AI Agent Monitoring and Galileo (quality, hallucination, drift) • State the trust posture: U.S. SaaS at GA; EMEA/APJC follow; no on-prem, sovereign, or air-gapped Cloud Control	Partner Summit - Cisco Cloud Control Executive Brief.pdf (Beat 8) TDM - Cisco Cloud Control & AI Canvas.Pdf(slides 48–49, 53, 54)
