# Field Notices Addendum 1: Export Options

## Operational Insights Portal

Offers two options for data download

- **Export PDF**: entire dashboard can be exported into a PDF. Option available at top right corner of the screen.

- **Export Results**: Each widget results can exported into CSV, JSON or XML format. Option available under each widget on hover.

*Note: It is advised to leverage Excel based NP report for more detailed data download.*

## Network profiler

Suitable for detailed reports. To generate report:

- **NP Home page** -> **Reports** -> **Schedule Reports**

- Select deliverable under '**Reports to generate**', respective parameters, click **Next** until you get **Create Report** option.

# Field Notices Addendum 2 : Daily Syslog Report

## Overview

- An email notification about the syslog's which are of interest to the customer.
- One fundamental component is the IC catalogue. There is a default Cisco catalogue that evolves over-time. Company-specific catalogue can also be developed. When both catalogues exist, the customer-specific catalogue takes precedence.

## Report generation

To configure Syslog Reports, perform the following:

- On the Insights screen, a Gear icon is available on the top right corner of the screen. Select **Syslog Reporting** from the menu options listed under the icon.
- On **Syslog Report generation** screen, select Meta data of the report i.e. who gets it, how frequently, what is the scope of the report and so on, and click on **Update** to register for automated syslog reporting.

You can leverage **Help** button on the top right corner of the screen to find more details on the Syslog Report generation process..

Note: The 'Group' filter is available only under 'Syslog Report'. It is NOT available on the Insights Portal under 'Diagnostic Analysis'.
