

On-Premise Content Strategy

Pre-Sales Stage 1

Learning Objectives:

By the end of this training:

1. Articulate the value proposition of Cisco's on-premise collaboration solutions (CUCM, CUBE, CMS)
2. Identify core components of the on-premise portfolio vs. cloud-connected options.
3. Match on-premise capabilities to specific customer business requirements.

Metrics of Success

Post completion, learner can demonstrate the ability to qualify on-premise opportunities effectively and successfully drive those opportunities into the proposal and solution development stages.

Series Structure

Sections	Modules	Module Type	Description	Link
On-Premise Solutions Overview	Core Architecture and Fundamentals			
	Call Control			
	Conferencing			
	Collaboration Edge			
	Endpoints			
Licensing and Flex Plan Essentials				
Value Positioning				
Roadmap and Lifecycle				
Assessment				

Deployment Stage 1

Learning Objectives:

1. Describe the high-level architecture of an on-premise collaboration environment.
2. Understand the high-availability design principles such as redundancy and Survivability.
3. Identify foundational troubleshooting techniques and the standard process for engaging Cisco Technical Assistance Center (TAC) support to maintain system operational health.

Metrics of Success

Series Structure

Sections	Modules	Module Type	Description	Link
On-Premise Solutions Overview	Core Architecture and Fundamentals			
	Call Control			
	Conferencing			
	Collaboration Edge			
	Endpoints			
Call flow, Design and Deployment Practices	SIP Fundamentals and SIP Trunks			
	Basic Call Flow			
Basic Troubleshooting	CUCM Troubleshooting Approach and issues			
	Log Collection, Packet Captures, and CSA tool			
TAC Engagement	How to engage with TAC
