Safe Harbor Statement

This presentation contains “forward-looking” statements that involve risks, uncertainties and assumptions. If the risks or uncertainties ever materialize or the assumptions prove incorrect, our results may differ materially from those expressed or implied by such forward-looking statements. All statements other than statements of historical fact could be deemed forward-looking, including, but not limited to, any projections of financial information; any statements about historical results that may suggest trends for our business; any statements of the plans, strategies, and objectives of management for future operations; any statements of expectation or belief regarding future events, technology developments, or enforceability of our intellectual property rights; and any statements of assumptions underlying any of the foregoing.

These statements are based on estimates and information available to us at the time of this presentation and are not guarantees of future performance. Actual results could differ materially from our current expectations as a result of many factors, including but not limited to: the unpredictable nature of our rapidly evolving market and quarterly fluctuations in our business; the effects of competition; and any adverse changes in our indirect channel relationships. These and other risks and uncertainties associated with our business are described in the company’s annual report on Form 10-K. The forward-looking statements in this presentation are made as of the date of the initial publication of this presentation, and we disclaim any obligation to update these statements at any time in the future.

Secure Collaboration

For the AI Era

Collaboration is Critical Infrastructure

Reliability, Resiliency and
Security are Non-
Negotiable

Flexibility and Governance
Are Core to Your AI Strategy

Webex Cloud & On-Prem
Enterprise Cloud.
Global Scale.
Proven Reliability.

Top Concerns of IT Leaders

Do I control my data?
Where it lives and who has access

Is my platform reliable?
Collaboration is mission-critical

Can I trust my vendor and the solution?
Security, longevity, and commitment

Will the architecture evolve?
At my pace, on my terms

Am I keeping pace with AI?
Securely, with governance and data protection

Geo-political: how can I comply with regulations?
Platform & data meet regional/country requirements

Cisco's Vision for the Future of Collaboration

Secure, resilient communication with end-to-end control and the flexibility to evolve

Control

Your data. Your policies. Your environment.

Reliability

Always available, mission-critical communication.

Flexibility

Modernize at your pace.

Security

Security “built-in” by default, end to end encryption

Innovation

Rapid, secure, and managed AI innovation.

Project Glasswing

Securing critical software for the AI era

Mythos Proview Anthropic

The principles that Cisco delivers across deployments

Flexible architecture

AI everywhere

Great user experience

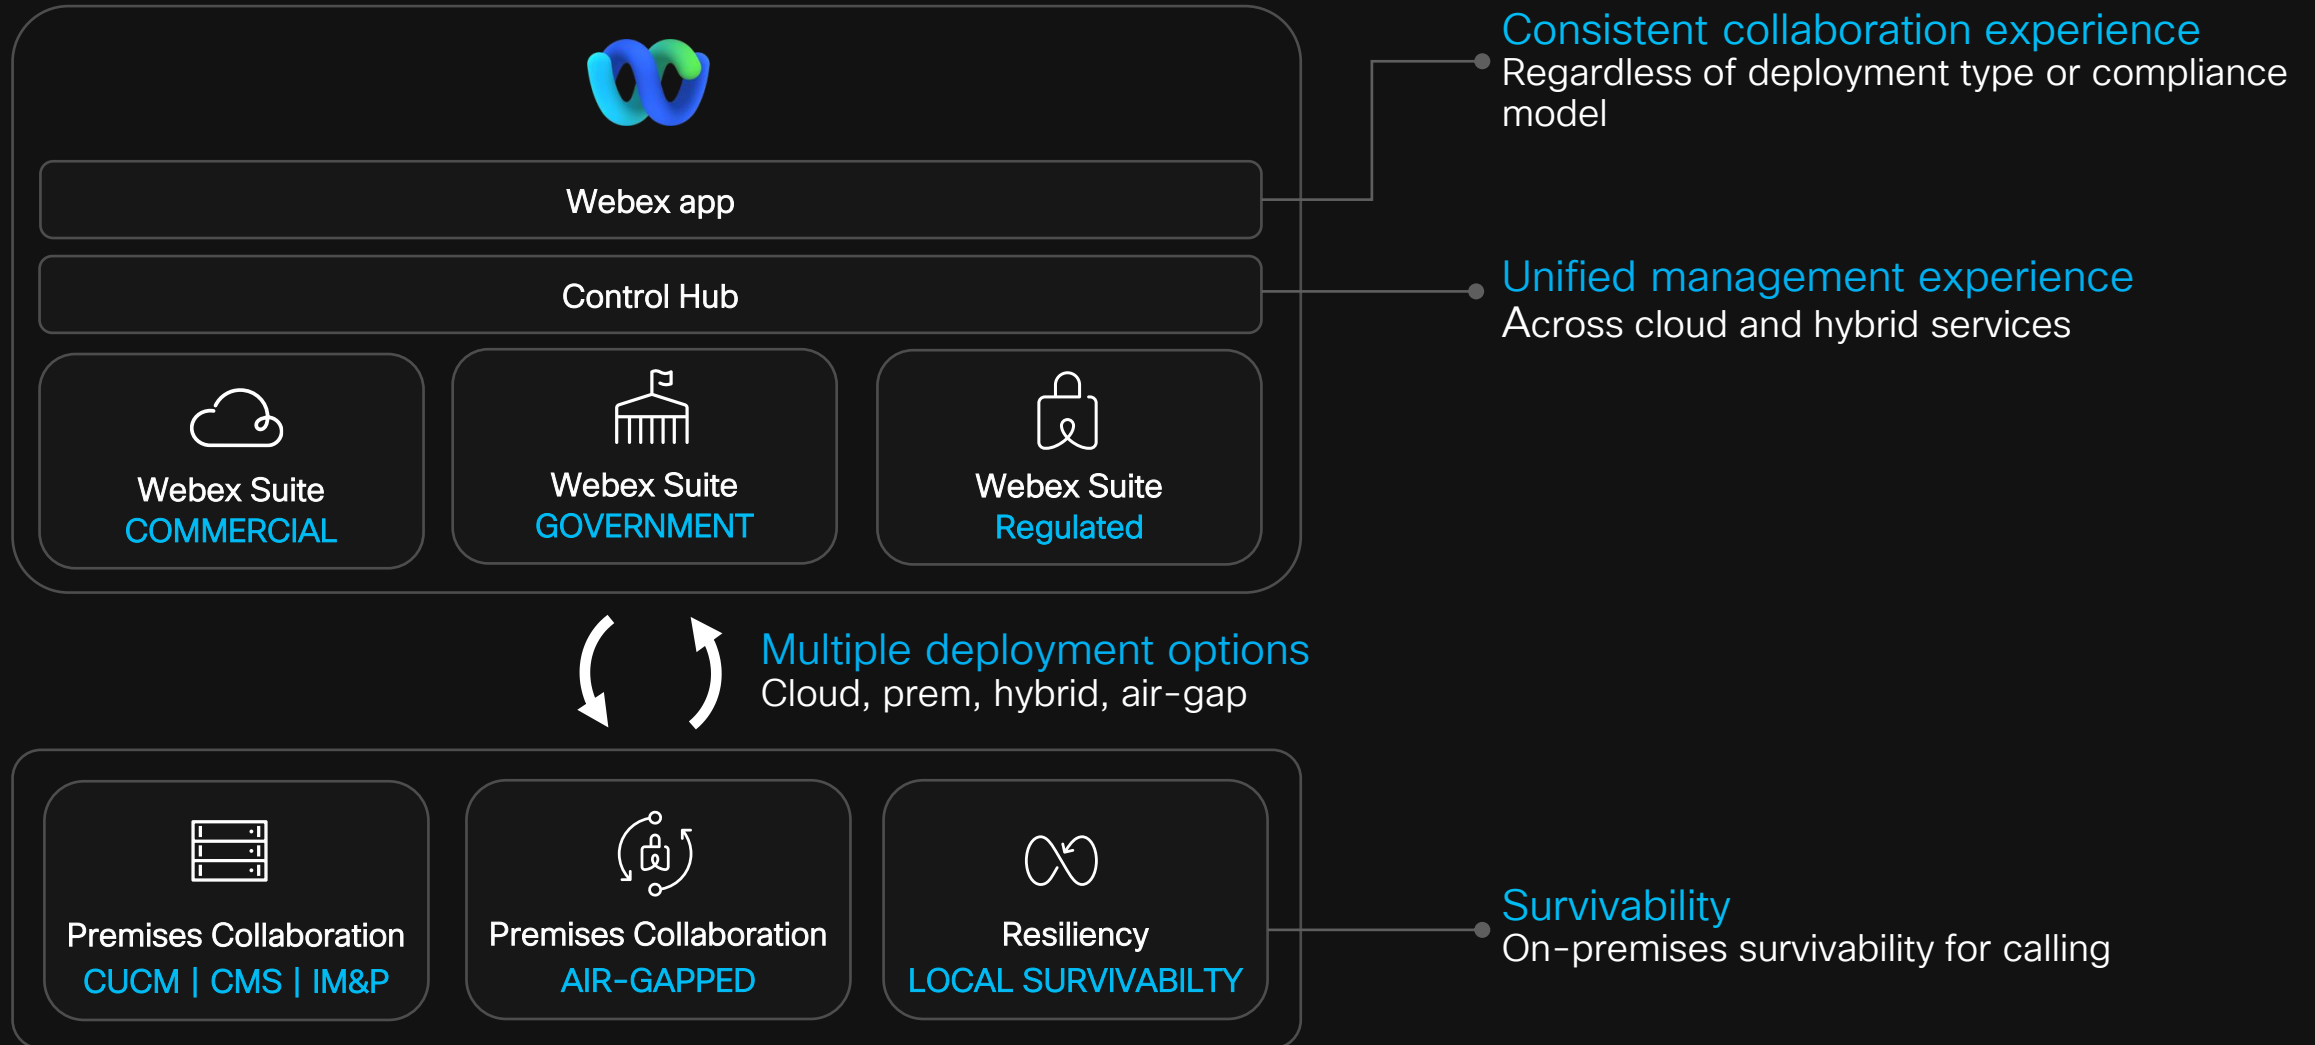

End-to-end security

Mission-critical resilience

Full-stack trust

On Prem + Cloud: Flexible Architecture

Available Today

The Future of Cisco Calling

Transformation to intelligent, resilient, and unified conversations

Cisco Calling Today

On-premises OR Cloud

Siloed employee & customer conversations

Manual call handling

Multiple points of administration

Connected Intelligent Voice

On-premises, Cloud, or Hybrid — all with survivability

Intelligent Conversations powered with AI assistant & agents, integrated with Co-Pilot

Intelligent, AI-powered call handling and speech-enabled auto attendants

Centralized administration with AI-powered, industry leading security and troubleshooting

99.999% SLA, available in 200+ commercial & regulated markets (Saudi, India)

Webex app, Microsoft Teams, Cisco Phones & Devices, 3P Phones, Analog devices

Best in class security with data-residency & sovereignty

The Future of Cisco Meetings

A unified, intelligent meeting experience for every deployment, everywhere

Cisco Meetings Today

CMS (on-premises) and Webex (cloud/hybrid)

Cloud/hybrid meetings require an internet connection

Different clients for different deployment models

Different meeting experiences for different deployment models

Different feature sets for different deployment models

AI only for cloud/hybrid meetings

Connected Intelligent Meetings

Webex as a single meeting platform for any deployment model

On-premise nodes provide survivable meetings for users with a local connection

Webex app for all deployment models

Unified user experience for all deployment models

Common feature set for all deployment models

AI for everyone

Data Governance and Regulatory Compliance

Ongoing Investments for Future-Proof Growth

Your Reality

Data localization mandates

Foreign vendor dependency unacceptable

AI required, data can't leave prem

Modernizing, can't rip and replace

Must prove compliance

Cisco Delivers

Regional data residency in many regions.
On-premises solutions globally.

Sovereign and air-gapped cloud services available in a growing selection of regions.
On-premises solutions globally.

Private AI on AI PODs. Transcription, summaries, translation – on your premises. Zero cloud dependency.

Hybrid. Cloud innovation on your existing UCM.
No migration required.

30+ certifications.
Post-quantum cryptography on the roadmap.

On-Premises Architecture

Flexibility to support a fully air-gapped environment and the flexibility to extend to the cloud

Available Today

- Industry-leading calling solution via UCM
- Webex meetings that can be deployed on-premise / air-gap

Committed Roadmap

- **Flexible AI with** on premises AI PODs and Webex AI for hybrid
- Splunk integration for **best-in-class observability and troubleshooting**

Future

- Consistent user experience with the Webex App
- Modern messaging experience

Air Gap Strategy – Timeframe Guidance

		0 to 6 Months	6-12 Months	12 – 18 Months	24 – 36 Months
Webex App	Identity & Authentication*		 Identity based on ECP node & Entra-ID		
	Presence				
	Chat			 Basic chat based On cloud conv service	 Persistent chat
	Meetings				
	Call and Phone				
On-prem AI (AI Pods)	AI for Meetings**				
	AI for Calling**				
	AI for Messaging				
Observability & Troubleshooting					

* Identity service running on-premise connected with Webex Identity and/or Entra-ID

** AI features include Captions, Transcription, Recording, Summarization, Translation (Cisco AI-POD infrastructure required to run AI scenarios)

NOTE: Jabber support will continue at least until an air-gapped replacement is in place.

Hybrid: The Cisco Advantage

Key Capabilities & Differentiators

Solution	What It Delivers
Cloud innovation without migration	Extend AI, analytics, PSTN, and management from the cloud to your existing UCM environment. Your infrastructure stays. Innovation arrives.
One management experience for hybrid services	Control Hub provides centralized administration, analytics, and troubleshooting across your entire hybrid environment today.
Modernize at your pace	Hybrid is not a waypoint. It's a permanent architecture. Stay hybrid indefinitely, or use it as a bridge to cloud when you're ready. The choice is yours.
Flexibility	Keep core collaboration on-premises for security and continuity, flexibility to move some workloads to the cloud

Cloud Architecture for Hybrid Deployments

Cloud-native collaboration solution that can also augment the on-premises experience.

Available Today

- Hybrid Calling extends services from the cloud to on-prem calls
- Hybrid Meetings provides on prem media management and cloud-anchored meetings
- Cloud messaging for integrated on-prem / cloud experience
- Cloud-native AI services for on-premises

Committed Roadmap

- AI-enhanced observability and troubleshooting
- Enhanced Security (Spam Detection, Deep Fake, etc.)
- Simplified administration with Control Hub
- Hybrid User

ON PREMISES SUITE STRATEGY

Provide mission-critical, secure, and customer-controlled collaboration—augmented with AI-driven and next-generation collaboration services — for organizations that require on-prem deployment, data sovereignty, and operational independence.

Overall Roadmap for Key On-premises Components

On-Premises: The Cisco Advantage

Key Capabilities & Differentiators

Solution	What It Delivers
AI with complete control	Collaboration AI PODs deliver transcription, summaries, and translation entirely in your on-premises environment. ¹
Air-gapped capable architecture	Calling, meetings, messaging, AI – all deployable in fully disconnected environments. Architected from the ground up.
Absolute data sovereignty	Your data. Your keys. Your policies. Your environment. Nothing leaves. Nothing is shared. Nothing is processed externally.
Flexible user experience	Enterprise collaboration through Cisco Jabber or the Webex App while maintaining on-premises call control.
Full-stack integration	UCM, CMS, and IM&P integrated with Cisco networking and security. One vendor. One architecture. End-to-end visibility.
Market leadership with Continuous Innovation	Proven, market-leading on-premises collaboration platform. Committed, ongoing innovation.

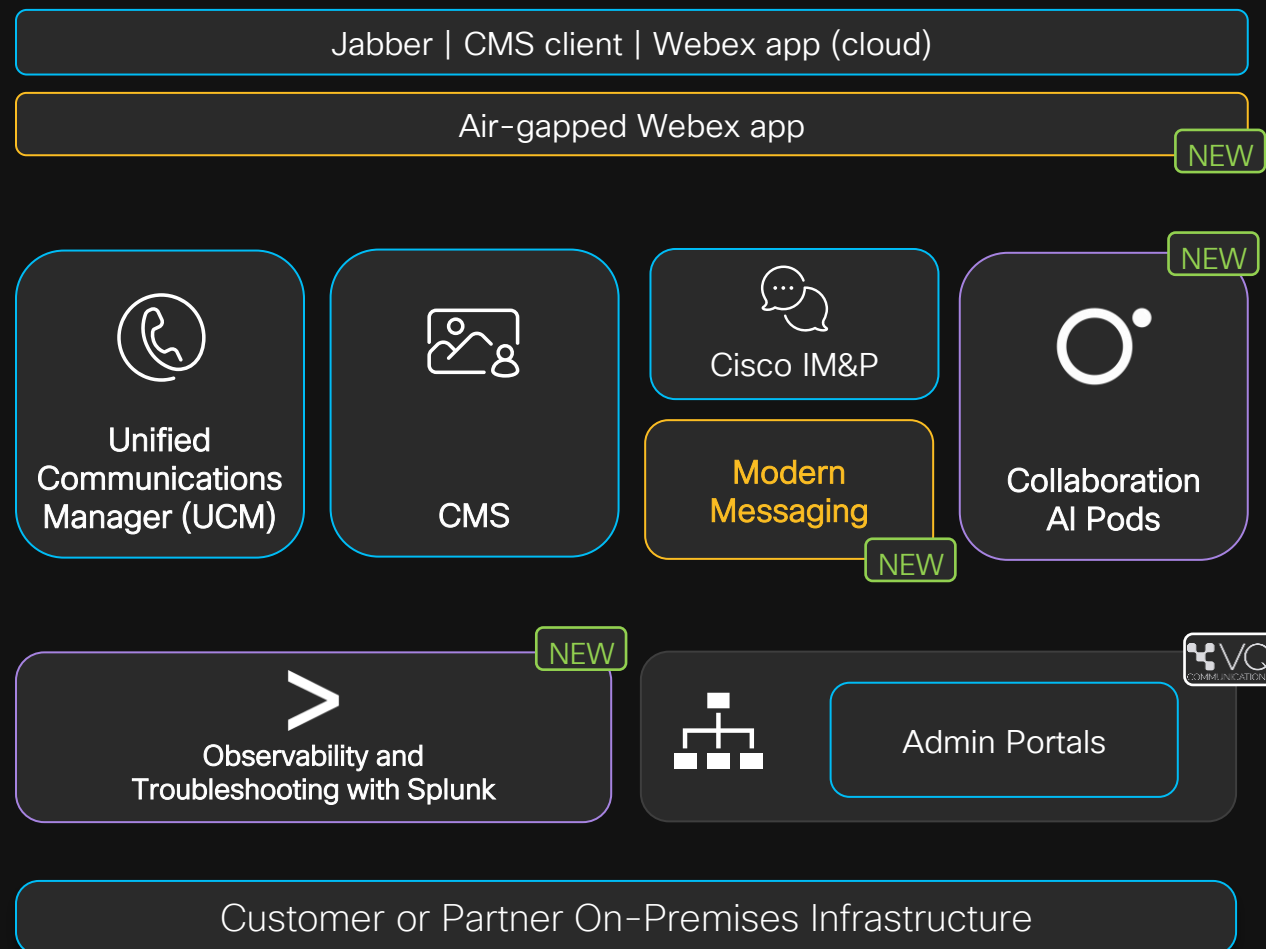

On-Premises: What's Available Today

Proven. Invested. Shipping

Workload	Solution	What It Delivers
Calling	Cisco UCM	Industry-leading on-premises calling. Full control of call routing, media, policies, and infrastructure. Air-Gapped capable. Hypervisor Flexibility (NFVIS-for-UC, Nutanix)
Meetings	Cisco Meeting Server	On-premises and air-gap capable meetings. No internet dependency required.
Messaging	Cisco IM&P / Jabber	Enterprise messaging, presence, LDAP directory integration. Air-Gapped capable.
AI	Collaboration AI PODs	Real-time transcriptions + captions On-demand transcriptions/Summaries + Action items. Multi-language support, Translations
Security	Customer-Owned	Full control of data storage and processing. Customer-owned encryption keys and policies. Fully contained within your environment. Air-gapped capable.

On-Premises Architecture

Flexibility to support a fully air-gapped environment and the flexibility to extend to the cloud

Available Today

- Industry-leading calling solution via UCM
- Webex meetings that can be deployed on-premise / air-gap

Committed Roadmap

- **Flexible AI** with on premises AI PODs and Webex AI for hybrid
- Splunk integration for **best-in-class** observability and troubleshooting

Future

- **Consistent user experience** with the Webex App
- **Modern messaging experience**

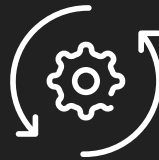

On-Premises: Roadmap

Areas of Investment

Enhanced User Experience

Single Webex app experience for calling, meetings, and modern messaging with offline support

Simplified Administration

Control Hub (Hybrid), On-premises Splunk, and AI Canvas

Ongoing Security Enhancements

New certifications, Post-quantum cryptography

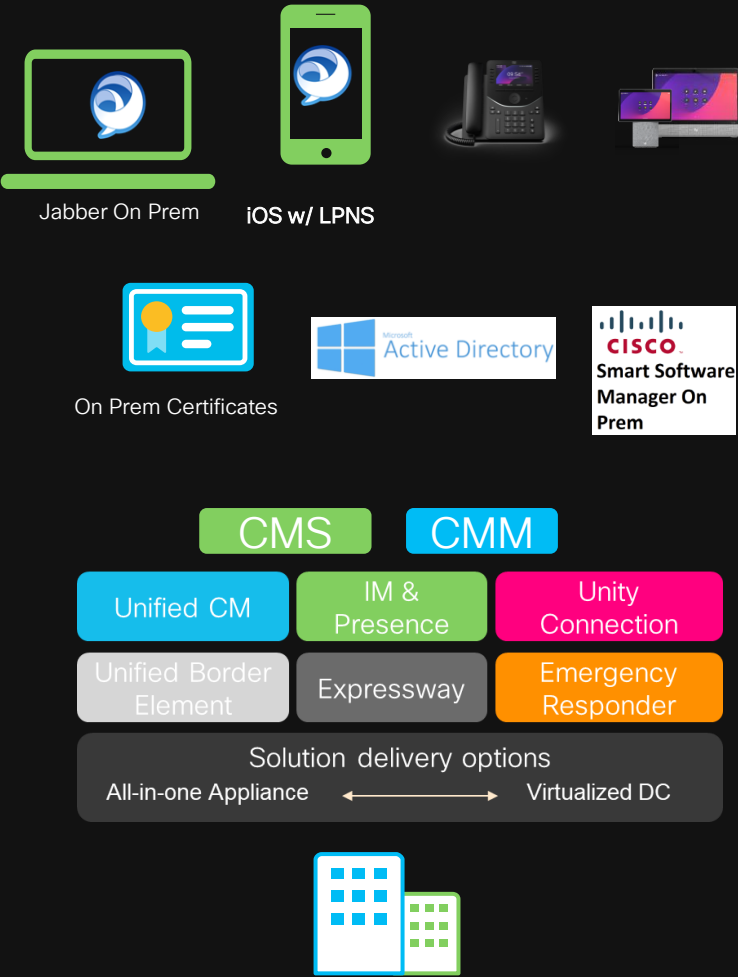

Secure AI Innovation

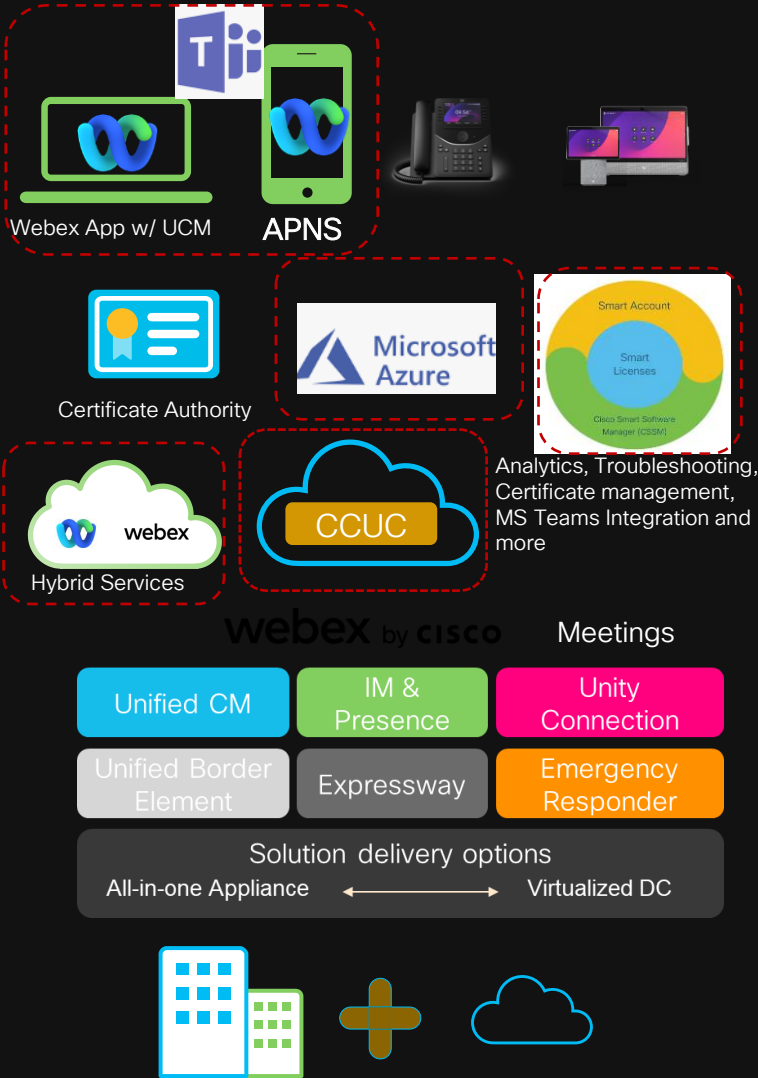

Continuous Innovation with Collaboration AI PODs

UCM empowers all deployment models

CY2027

16

MARKET VALIDATION

- 30M+ enterprise users trust UCM
- Version 16 reinforces Cisco's leadership in enterprise calling

CONTINUED COMMITMENT

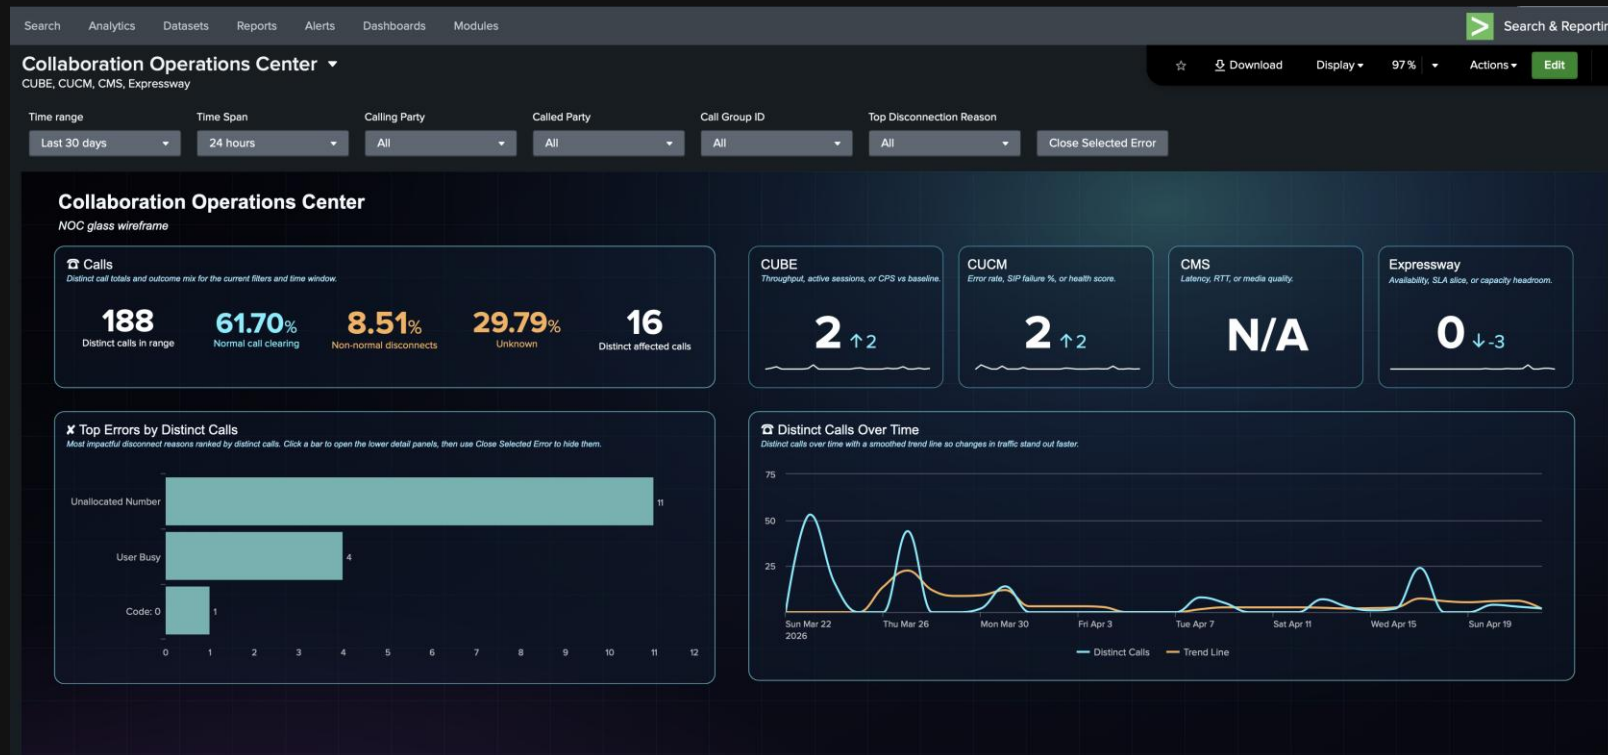

- Long-term investment in on-premises and hybrid calling
- Proven reliability + security enhancements

INNOVATION WITH CONFIDENCE

- Integration with Webex cloud & AI services
- Future-ready roadmap ensures evolution at your pace
 - AI Pod support for private / air gap deployments
 - Post Quantum Cryptography
 - Splunk & AI Canvas Integration
 - Open-Source Hypervisor Alternative
 - Security & Compliance Certifications

UCM Add-on for Splunk

Roadmap
2H CY26

- Proactive troubleshooting
- End-to-end call visualization
- Compatible with air gapped environments
- Visibility into system health, performance, and usage trends
- Comprehensive Operational Reporting
- CMS Support

UCM / DI Roadmap

UCM15 SU5

(Sept 2026)

Troubleshooting & Observability

- Splunk Support (Phase-1)

Simplified Administration

- Support for New Room OS Devices
- CER - new switch support

Security & Compliance

- FIPS 140-3
- IPVMS SHA2

Hypervisor

- ESXi 9.X (vSphere Foundation)
- NFVIS 26.2: M8 Series Support

UCM15 SU6

(March 2027)

Secure AI Innovation

- Hybrid: On-Prem AI (UCM Device Support)
- AI Pod Support

Simplified Administration

- Splunk Support (Phase-2)
- Hybrid: Simplified Certificate Renewal Management

Security & Compliance

- DoD: HTTP2 Support
- DoD: Restrict User & Management Source IPs
- Enhanced ELIN

Hypervisor

- ESXi 9.x (Cloud Foundation)
- Mixed Hypervisor Support to Simplify Migrations

UCM 16

(2H 2027)

Security & Compliance

- Common Criteria (incl EU), CSSfC, USGv6
- FIPS 140-3 for SRTP on IOS-XE Platforms
- Post Quantum Crypto Encryption

Simplified Administration

- Smart Licensing Enhancements

Hypervisor

- Open-Source Hypervisor
- Nutanix on 3rd-Party H/W

Platform Updates

- Major OS & Library Upgrades
- Licensing Enhancements
- CME: Webex Calling MT 3rd-Party Legacy Integration Support
- CUBE / SRST/ CME: New Platform/Router Support

CALLING AND MESSAGING

PRODUCT OVERVIEW

Cisco Unified Communications Manager

- Registers endpoints and provides enterprise voice and video calling features.
- Full control over dialing, features, security, and scale while keeping call control entirely within their data center.

Cisco Unity Connection (CUC)

- Voicemail, auto-attendant, and call routing.
- Reliable, compliant voice messaging w/o cloud reliance.

Cisco IM & Presence (IM&P)

- Instant messaging, presence, and federation services.
- Real-time presence and messaging, compliant by design.

Cisco Emergency Responder (CER)

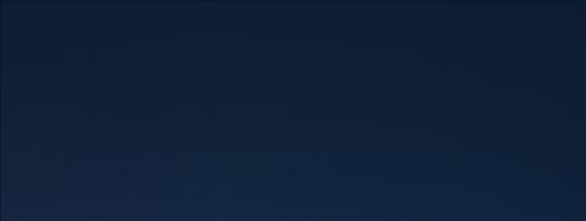

- Dynamically tracks user locations, accurate routing to PSAP
- Precise caller location, call routing, and real-time alerts.

Session Management Edition (SME)

- Centralized session control and call routing across clusters
- Global architecture, simplifies dial plans, improves resiliency

FY26 INVESTMENTS

- **Hybrid Services.** Cloud-based features that provide next-generation innovation.
- **AI Services.** Hybrid Webex Assistant leveraging cloud services available to Webex Calling, and eventually air gap AI solutions via AI Pods.
- **Hypervisor investments.** Ongoing CUCM investments in hypervisor support, including NFVIS and Nutanix alternatives to VMware.
- **Compliance Updates.** Ongoing CUCM investments in FIPS, Common Criteria, IPv6, and DoDIN regulatory compliance.
- **Certificate Management.** Ongoing CUCM investments in certificate management, including support for industry-standard ECU requirements.

On-prem Meetings

Delivering a seamless, reliable meeting platform that sets new standards for quality and stability, with intuitive, AI-powered experiences inspired by Webex.

Vision & Strategy

CMS 4.x

On-Premises Meetings Roadmap

Cisco Meetings Server (CMS)

Q1 CY26

Cisco Meeting Server

- 3.13 Release
(Security Fixes and features)
- Hypervisor
Flexibility: Nutanix

Q2/3 CY26

Cisco Meeting Server: 4.0 Release

- New UX, New Media framework
- Breakout Rooms
- Outlook Scheduler
- Real Time closed captions
- Noise Removal
- Hypervisor
Flexibility: NFVIS

2H CY27

Cisco Meeting Server: 4.1 Release

- Video layouts enhancements
- SfB support
- Hardware scalability enhancements

Future

- Webex app experience
- Enhanced survivability for Webex Meetings
- Lots more

CMS 4.x Callouts

1.

Media Framework

- Webex Media framework replicated on CMS to provide similar meeting quality as Webex.
- Introduces latest resiliency protocols for both web app and SIP endpoints
- Enhanced MARI/TWCC for web app
- FEC and RTX used when SIP devices support them

2.

Refreshed UI

- Web app meeting experience just like Webex

3.

All in on AI

- Support for Real time Closed captions
- Native noise removal
- Getting ready for AI features (Summaries, transcriptions etc.)

4.

No more legacy codecs

- Removal of legacy codecs like H263+
- Focused investment on H264/AV1 for Video, Opus for Audio and AV1 for content share

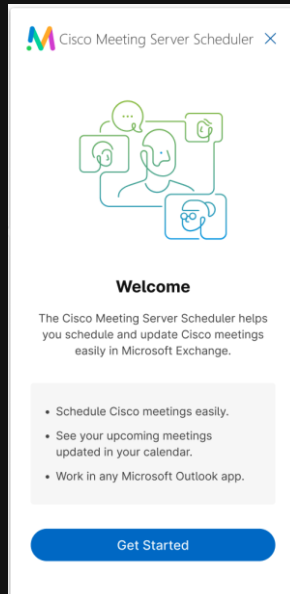

5.

Improved Security

- TLS1.2 default transport mechanism.
- Discontinue TLS 1.0/1.1
- Support for TLS1.3 for all services
- UEFI boot and secure boot and storage
- Latest cryptographic ciphers

Scheduling and Device Management

Scheduling

Device management

Release 4.0: Improve User Experience on CMS

A Fresh Look (Inspired by Webex)

- Join experience updates
- In meeting updates

Improved Quality and Stability

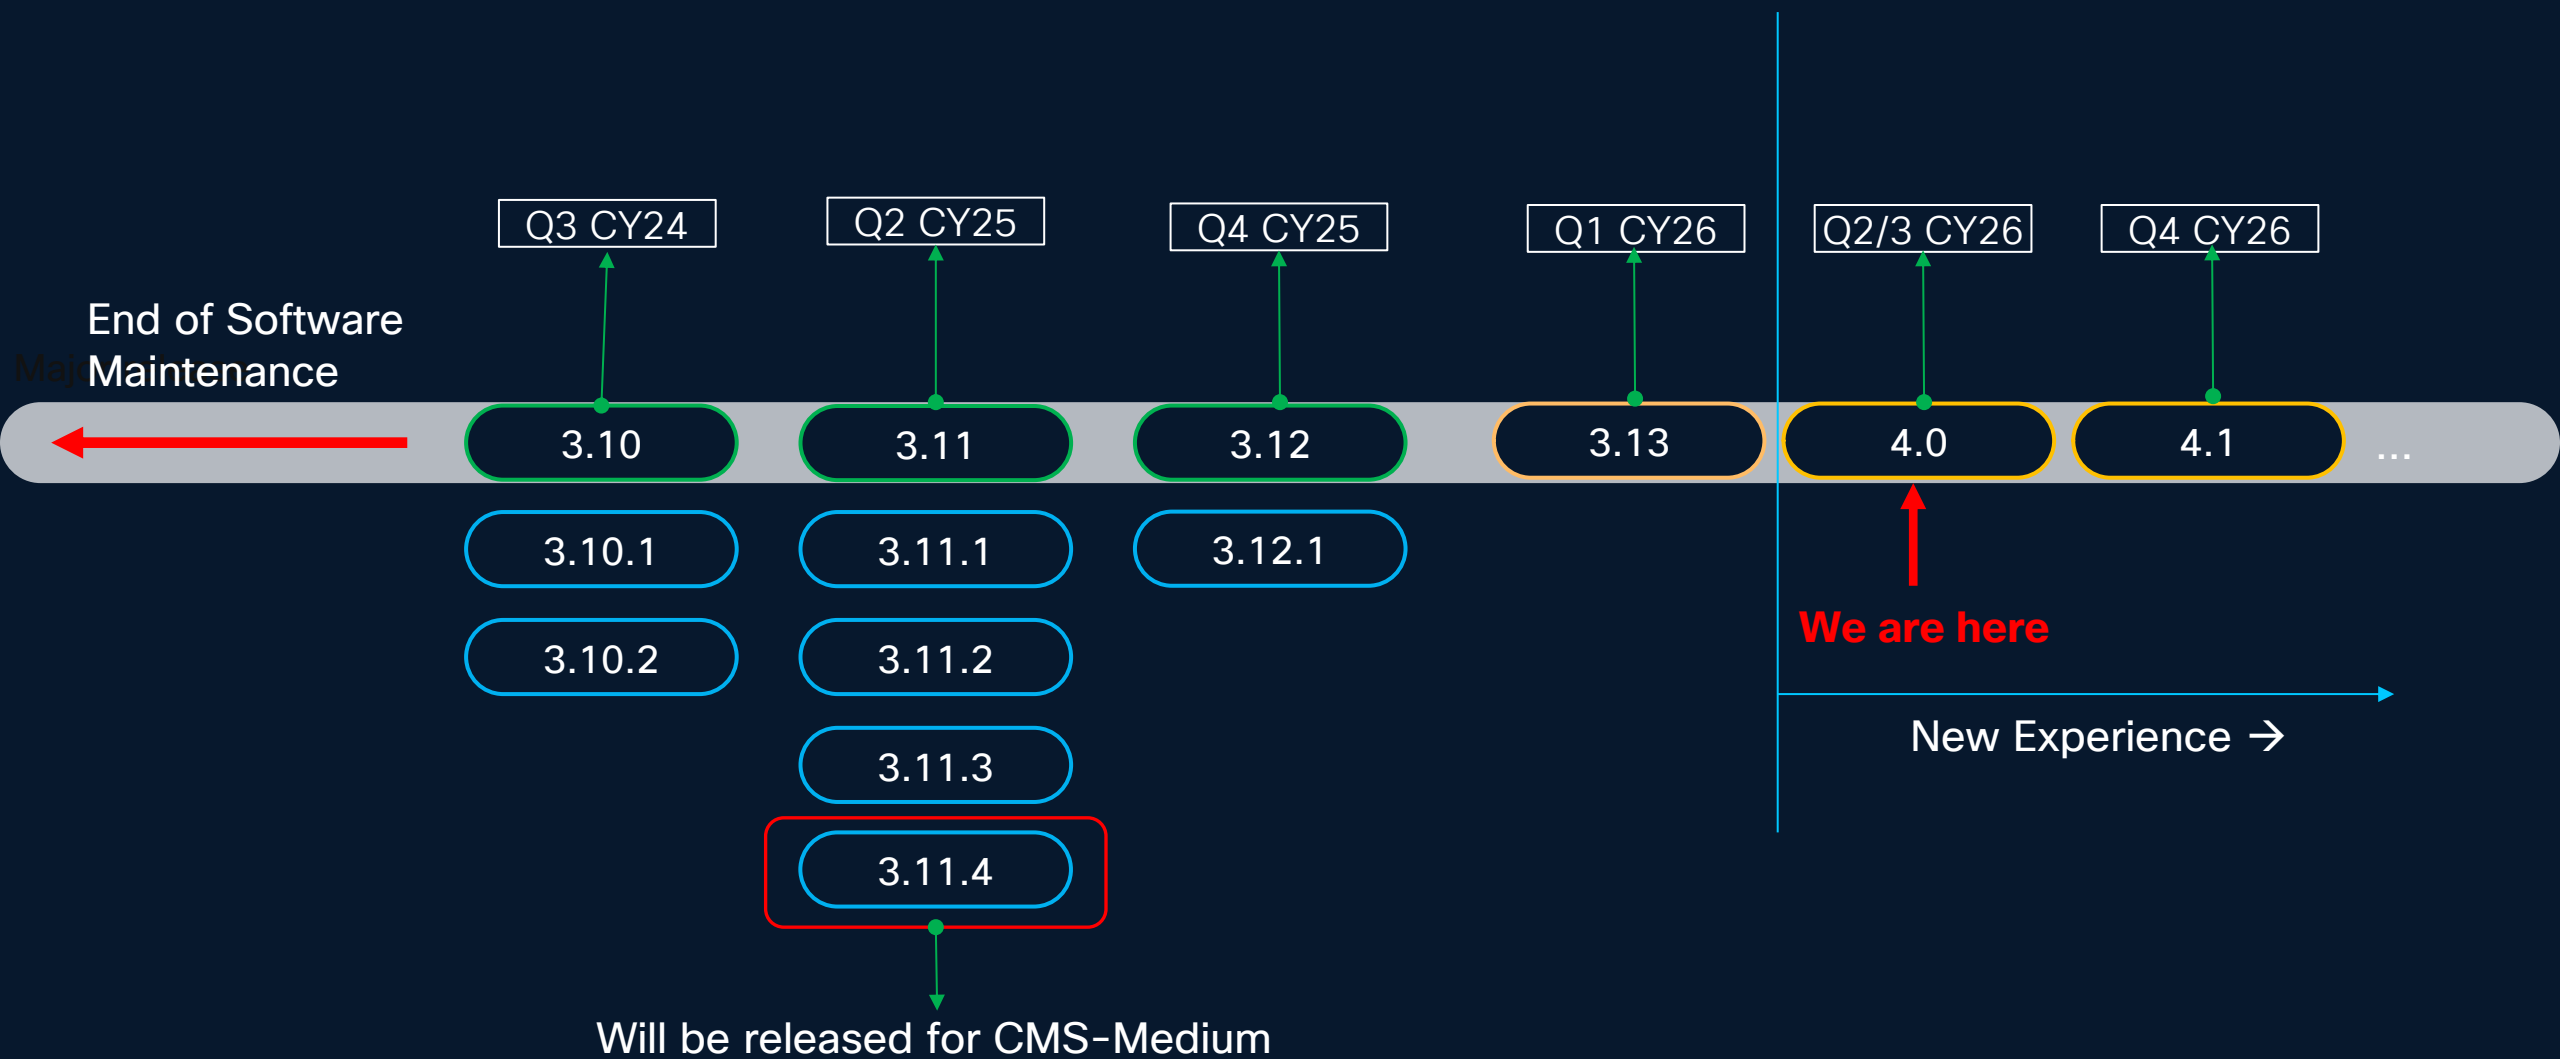

- Webex Media Framework: Revamped for CMS
- Media Resiliency with TWCC and MARI
- Video layouts (just like Webex)

AI Powered

- Automated Closed captions
- Noise Removal (Client and Server side)
- Improved background blur

Release-Overview

CMx Release 3.13

GA: March 2026

🌟: New Features

🚀: Improvements

Will be last release of 3.x train. Will be supported until 4.3 is released (Tentative Timeline: Q2CY27)

Meeting Experience (CMS & web app)

Engaging Experience

- CMS coSpace PIN hardening (minimum 8 digit) 🌟

Core & Interoperability

- Upgrade to FOM 7.3a (FIPS 140-3) 🌟
- Security Improvements 🚀
- Turn Short Lived Credentials with Expressway [BETA] 🌟
- Nutanix Support 🌟

Meeting Management

Management

- Scale numbers for CMS-Medium 🌟
- Security Improvements 🚀
- Nutanix Support 🌟

On Premises App Strategy

Jabber

Air gap and sovereign data solution

Continued business continuity investments, with strategic investments in air-gap solutions like AI.

- Long-term support for on-premises and air-gapped deployments
- Essential Media AI intelligence to enhance audio/video experiences
- Unified CMS meeting experience with the CMS web client

Webex

Rapid innovation through cloud solution

Supports pure cloud and hybrid service deployments, leveraging Webex cloud. Leverages substantial cloud roadmap and AI innovations

- Innovation for on premises, hybrid, and cloud models for calling.
- Hybrid services investment for cloud-based innovation to calling.
- Deliver latest AI innovations for cloud and hybrid deployments

Cisco Jabber priorities

Provide critical
security fixes

Deliver selective
regulatory
compliance
features

Maintain
compatibility with
new versions of
device and OS

Maintain
compatibility with
new versions of
Cisco UC apps

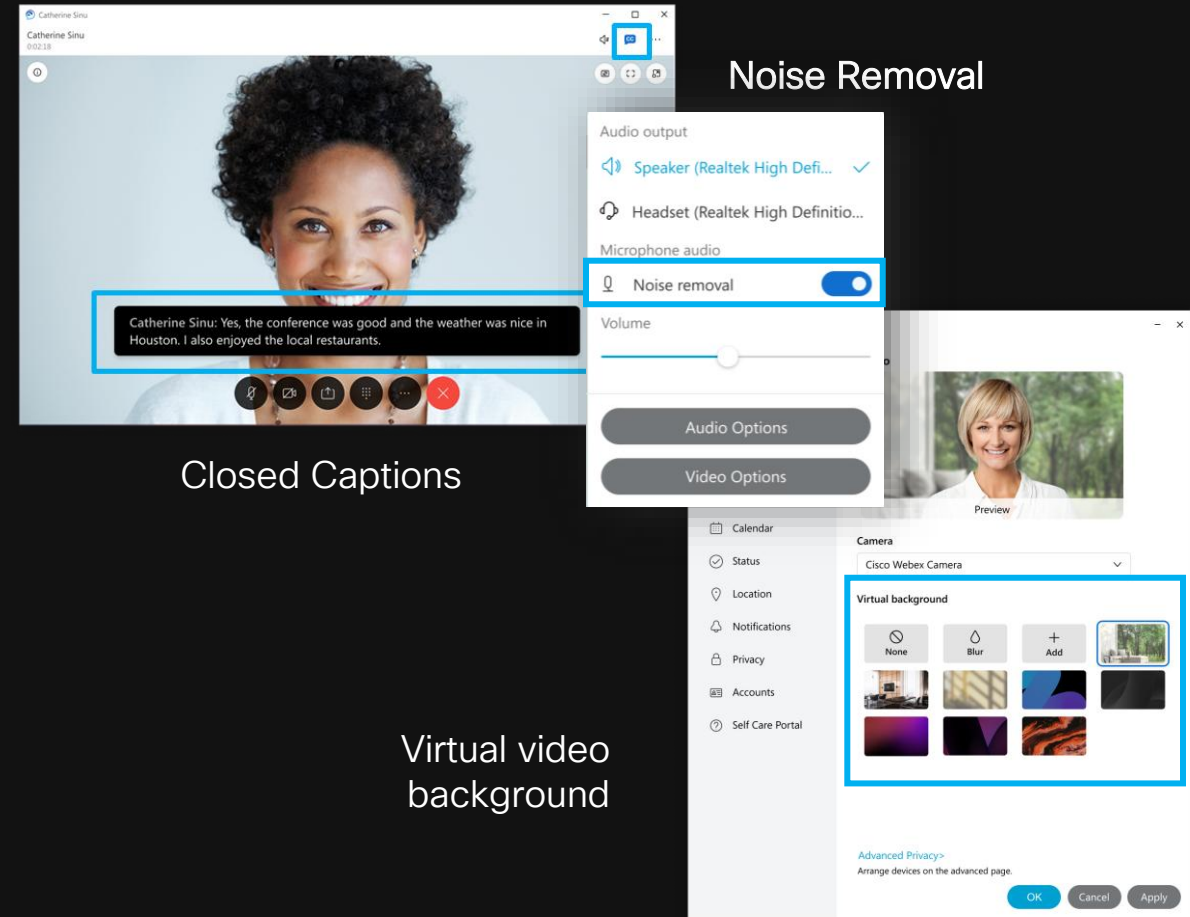

Cisco Jabber Roadmap

Recently Launched:

- Blur video background
- Admin control automatic answer tone volume
- User confirmation of unmute by host in CMS meeting
- Add/Edit/Delete custom contacts on iOS Devices

What's coming:

- Set virtual video background background
- Noise removal
- Closed captioning
- Unified CMS meeting experience by always using CMS Web app

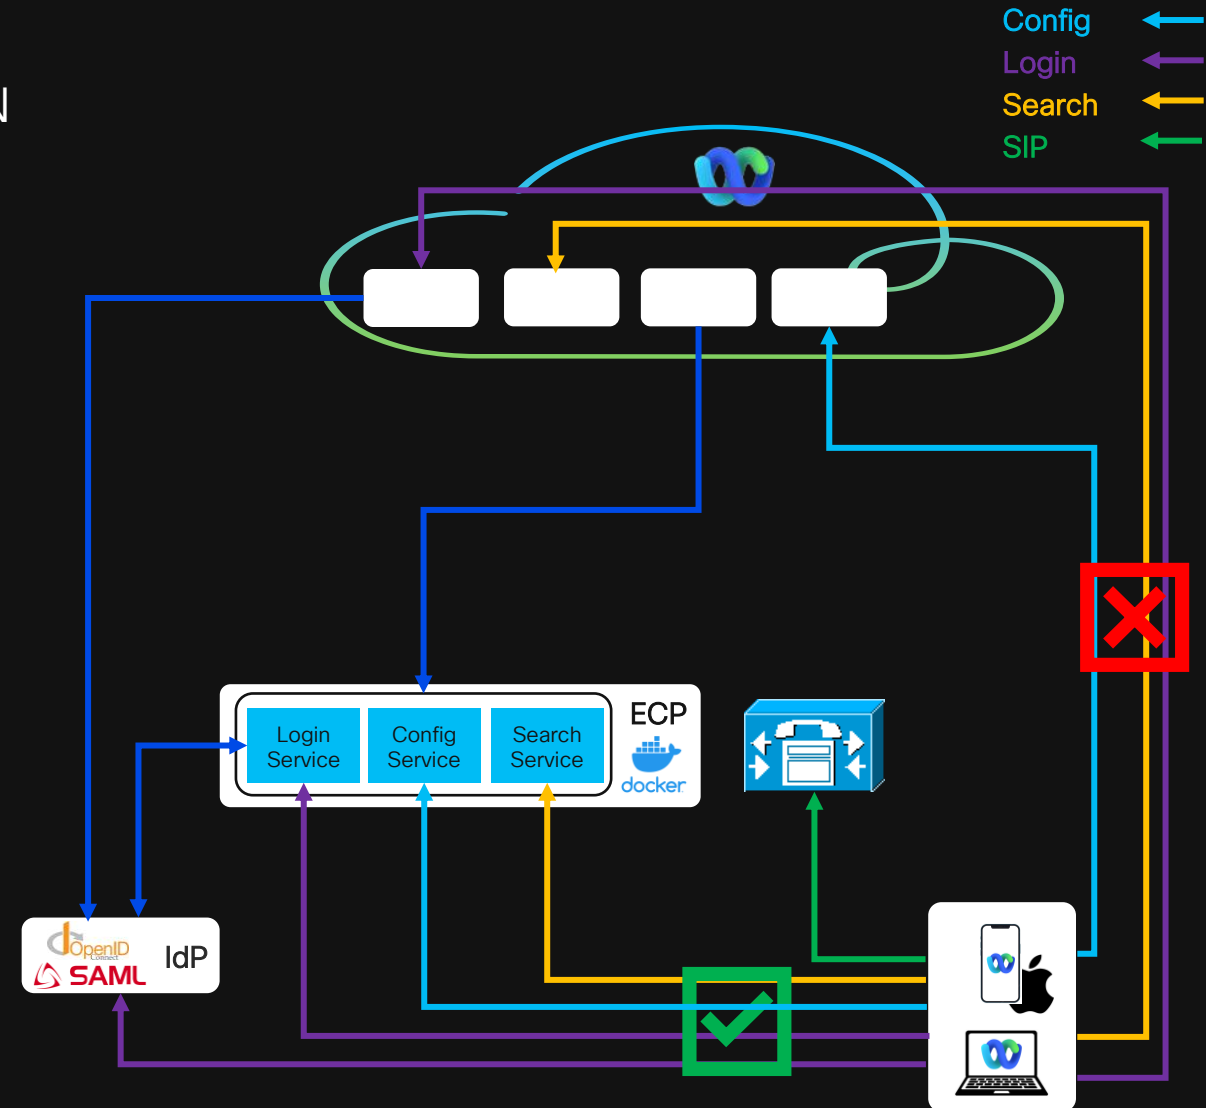

Cisco Jabber Roadmap

Roadmap
Subject to
Change

	15.1 (GA)	15.2 (GA)	15.3 (Q2 CY26)	15.4 (Q4 CY26)
User Experience	- Win: Blur video background - Admin option to disable Do Not Disturb(DND) presence - Admin control automatic answer tone volume	- End user confirmation of unmute by host in a CMS meeting - Add/Edit/Delete custom contacts on iOS device	- Video background replacement - Noise removal - Enhanced CMS meeting experience	Closed caption
Security and Compliance	HTTP 2 support	- FIPS 140-3 - Common Criteria		
Devices and OS	- iOS 26 - Thin or Fat Client OS - Ubuntu 24.04 - Unicon elux 7	- macOS Tahoe - VDI: Omnissa Horizon - Xcover 7		

Enhanced Survivability Including New Sign-in (UCM/DI)

- Having trouble logging into Webex when the WAN is down? With this feature, you can still log into Webex app to get calling services during the outage
- PSTN calling and most calling features are available: hold/resume, transfer, conference, multi-line, hunt group, etc
- Contacts search is supported
- Local call history is displayed
- UCM SSO must be enabled
- Desktop and mobile; LPNS is mandatory to get the calls on iPhone, iPad

On-premises Messaging and Presence

Available Today

**Secure, on-premises
messaging for controlled and
compliant collaboration.**

Enterprise 1:1 Messaging

- Direct messages between internal users
- Federated chat (if XMPP federation is enabled)

Enterprise Presence

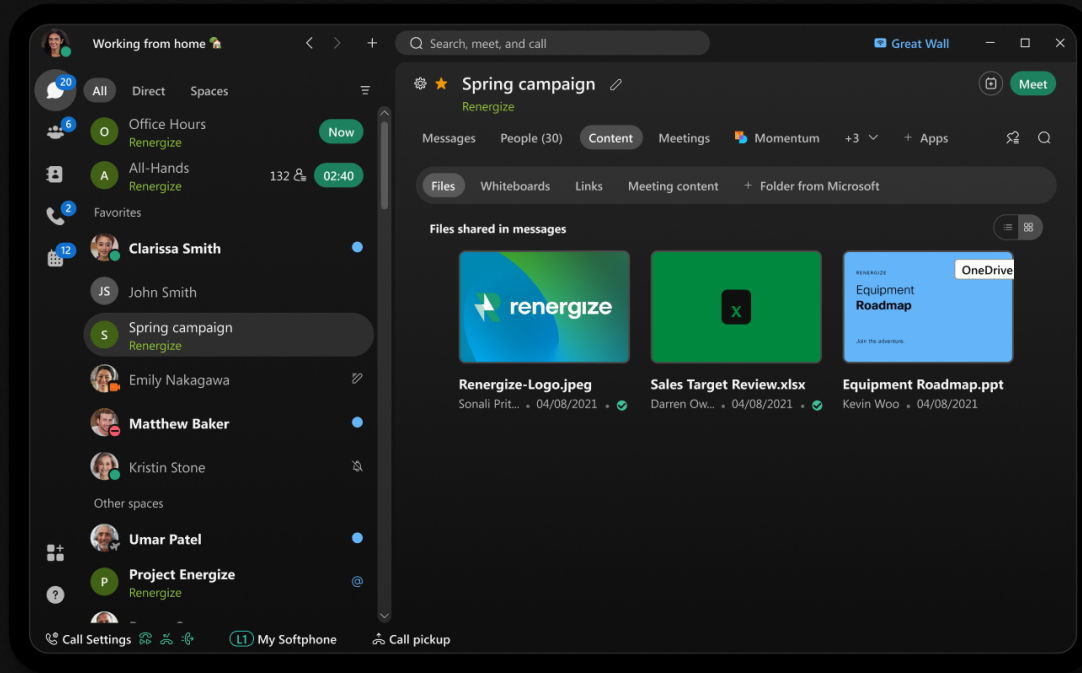

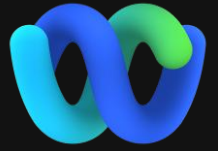

- On-prem user availability (Available, Away, Busy, DND)
- Phone status presence (On a call)
- Calendar-based presence (if integrated)

Contact List Integration

- LDAP directory lookup
- Corporate contact groups
- Presence visibility for internal users

On-premises Messaging and Presence

Exploratory Roadmap (Under Evaluation)

A modern, air-gapped messaging solution delivered in the Webex app improving upon the current Jabber IM&P capabilities and provide next-generation messaging.

Webex App for On-premises Calling and Meetings

Available | Committed | Future

Enterprise Calling via Webex app

- Webex app supports CUCM for Calling today (with Cloud connectivity)

Webex app survivability (Q4CY26)

- Login when the cloud is down

Air-gap support for Calling and Meetings

- New and Improved Webex app will support CUCM Calling and CMS Meetings in a fully air gapped environment

VISION FOR AI

*Empower every organization to **run Webex AI securely within their own data centers** – unlocking transformative collaboration while preserving control over your own data.*

NEW

Bring Webex AI On-Premise with Cisco AI PODs

The power of Webex AI in a simple and
easy to deploy, administer and
troubleshoot on-premise configuration

Deploy, scale and innovate with confidence

*For CMS and soon Webex Video Mesh, with Calling and
Contact Center integrations in the future*

Business Problem

The AI Dilemma: Balancing Innovation with Enterprise Control

Regulatory & Compliance Hurdles

Strict data residency requirements (e.g., Finance, Healthcare, Government) struggle to adopt AI while adhering to GDPR, HIPAA, or local data sovereignty laws.

The "Black Box" Challenge

Enterprises lack visibility and control over how their data is being used to train third-party models, leading to concerns regarding intellectual property leakage.

The Data Sovereignty Risk

Relying on public cloud AI models often requires moving sensitive proprietary data outside the corporate firewall, creating significant compliance and security exposure.

Business Solution

Collaboration AI PODs: Secure, On-Premise Intelligence

Total Data Sovereignty

Collaboration AI PODs ensure that your sensitive information never leaves your environment, satisfying the most stringent security audits

Controlled AI Evolution

Access advanced AI while maintaining full control over your data and updates to drive your digital transformation.

Enterprise-Grade Integration

Designed to plug directly into your existing network architecture, minimizing deployment friction and ensuring seamless interoperability with current collaboration platforms.

Collaboration AI PODs

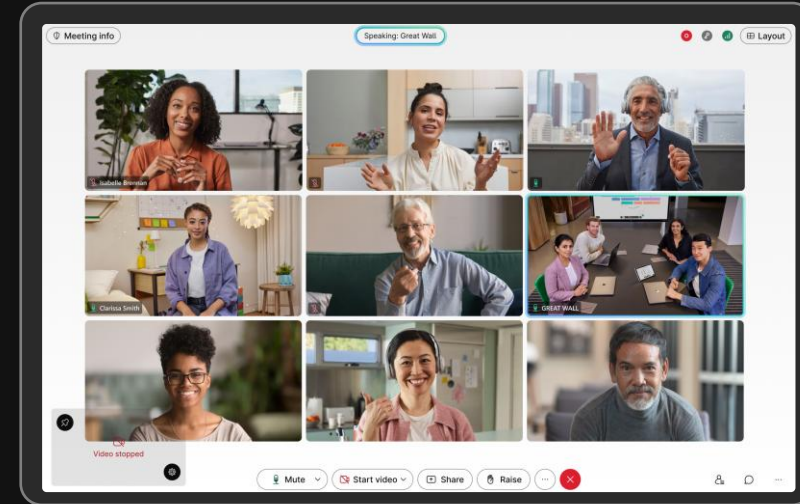

Enterprise-grade private AI, purpose-built for privacy, performance, and total control.

AVAILABLE NOW – GA YESTERDAY (JUNE 17th)

- Real Time Transcriptions + Captions

ROADMAP:

- Batch Transcriptions
- Summaries, Action Items
- Translations
- Calling AI Assistant
- Voice Agent for on-premise
- ASR and TTS for Contact Center
- AI for Messaging (Exploratory)

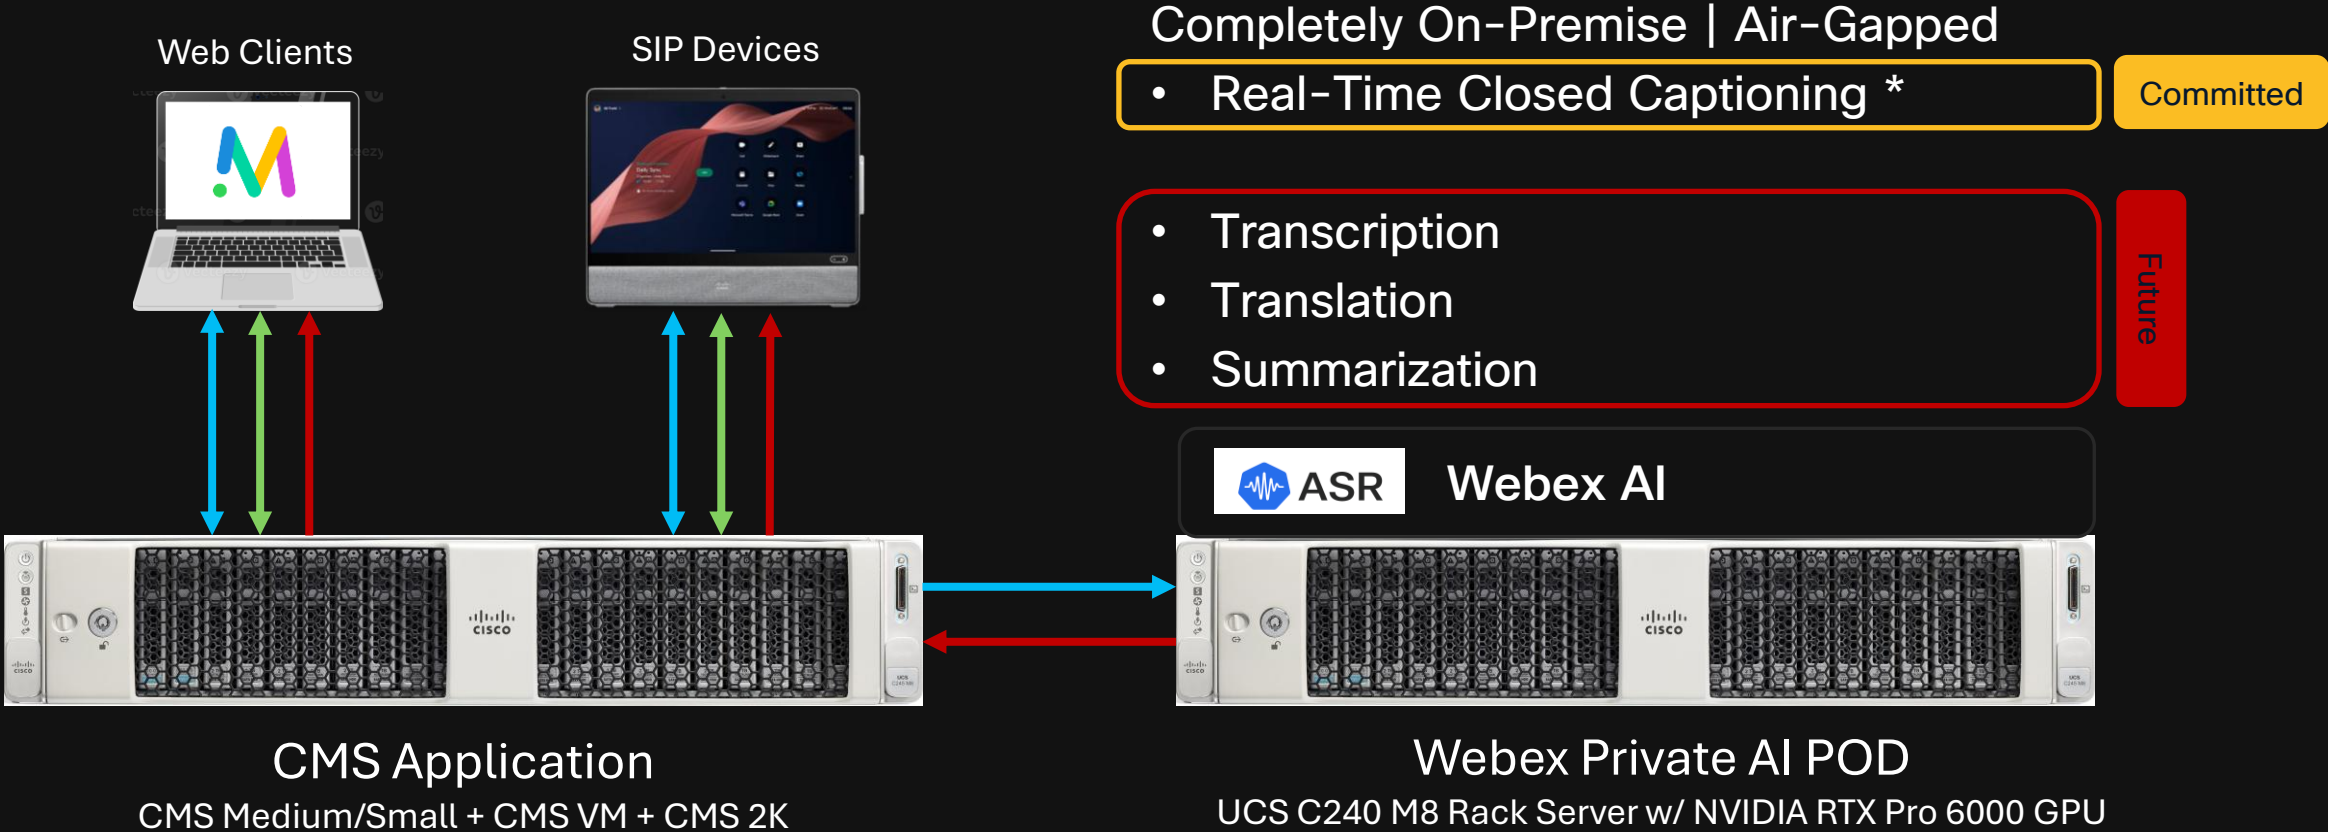

Managed via Webex Control Hub
Zero Trust: End-to-End Encrypted
Cisco AI Assistant in Meetings

AI PODS: AI FOR AIR GAP

PRODUCT OVERVIEW

- **On Premises AI:** On-premises AI infrastructure supports air-gapped environments for secure, sovereign AI workloads.
- **Pre-validated, full-stack AI infrastructure:** Cisco AI PODs are modular, pre-validated solutions that combine compute, networking, storage, and software to streamline deployment of enterprise AI.
- **Accelerates AI lifecycle adoption:** Speeds up AI deployment with high-performance GPUs and unified management tools, reducing infrastructure complexity.
- **Enterprise-grade security and scalability:** Secure, scalable AI with robust networking, integrated security features, and flexible architecture.
- **Hybrid Services AI:** By forking the media, customers can leverage cloud-based AI with meetings and calling anchored on premises

FY26 INVESTMENTS

- **AI Speech Recognition (Meetings):** Launch AI Pods with air gap support for live meeting transcriptions, closed captions, post meeting transcripts, and AI Assistant processing.
- **Collab-wide support (FY26 Meetings).** Start with meetings (CMS) but invest in gRPC library to allow support for calling (CUCM), contact center (UCCE / UCCX), Jabber, Video Mesh, and the Webex App.
- **Hybrid AI Services (Calling).** Hybrid Webex Assistant leveraging cloud services available to Webex Calling, and eventually air gap AI solutions via AI Pods.

How to get started: Beta Testing

1.  Download the 60-day trial software (Availability - June '26)
2.  Install the Collaboration AI PODs software on your hardware (VMware Esxi 8.0)
3.  Integrate the Collaboration AI PODs to CMS 4.0 Beta 1 (Target availability - June '26)
4.  Enable the AI Assistant on the next CMS meeting

Cisco Collaboration Devices

A modern conference room with a large wooden table, white chairs, and digital displays on the walls. The room is dimly lit, with the primary light source being the screens and ambient lighting. The text is overlaid on the center of the image.

Creating radically simple rooms that are
Beautiful. Functional. Inclusive.

CONNECTED INTELLIGENCE FOR INTELLIGENT WORKSPACES

Why Cisco Collaboration Devices are #1

A fully integrated workplace experience solution

Innovative AI-powered collaboration experiences

An open ecosystem with best-in-class interoperability

Proven enterprise-grade security and compliance

AI-assisted management with unrivalled insights

Advanced 3D-workspace planning and optimization tools

Reimagine every workspace

For any worker, any workstyle, and any platform

Optimized for Webex Calling

Flexible deployment options powered by PhoneOS

Cisco Wireless Phone 9821

Mobilize your frontline workers
with purpose-built Wi-Fi 6E phones

- | Connected intelligence with AI notes, actions, and summaries
- | Robust and reliable design with action button & push-to-talk
- | Centralized management and ThousandEyes support
- | Enterprise cloud or on-premise calling
- | Expands 9800 Series portfolio, runs Phone OS

Air Gap Solution roadmap in ONE user experience

As of May 2026

		0 to 6 Months	6-12 Months	12 - 18 Months	24 - 36 Months
Webex App	Identity & Authentication*		 Identity based on ECP node & Entra-ID		
	Presence				
	Chat			 Basic chat based On cloud conv service	 Persistent chat
	Meetings				
	Call and Phone				
On-prem AI (AI Pods)	AI for Meetings**				
	AI for Calling**				
	AI for Messaging				
Observability & Troubleshooting					

* Identity service running on-premise connected with Webex Identity and/or Entra-ID

** AI features include Captions, Transcription, Recording, Summarization, Translation (Cisco AI-POD infrastructure required to run AI scenarios)

NOTE: Jabber support will continue at least until an air-gapped replacement is in place.

On-prem planning

CALLING , MESSAGING, EDGE

- Security and Compliance in SU3 CY25 Q4
- Hypervisor alternatives in SU4 CY26 Q1.
- ECU SU5 -CY26Q3
- HTTP2, ESXi 9 in SU6 (tentative EoCY26)
- Release 16 (CY27)

AI Pods

- Webex AI Pods (v1.0)Q2 CY26. RTT supporting five languages
- First Integration with CMS will be available from CMS 4.0 release
- 1.1 to include Transcription, Translation, and Summarization

FLEXIBLE DEPLOYMENT

- Commercial exp to India (WxCC), UK Data Residency
- Sovereign/regulated DC in US (air-gap trusted roadmap)
- Data sov, private cloud - In-country hosted CUCM, CMS via partners On Prem, Air Gap via customer

COLLABORATION ENDPOINTS

- Jabber 15.2: confirm unmute by host in a CMS meeting, Edit custom contacts
- Jabber 15.3 (CY26Q1): vid bkgrnd, Noise removal, CMS meeting experience
- Jabber 15.4: Closed Captioning
- 9811, 9821 released

MEETINGS

CMS 4.0 (July)

- Refreshed app (Inspired by Webex)
- Enh. media resiliency
- Breakout Rooms
- Web app noise Rem.
- CAPTCHA for guest
- Real Time Closed Captions [BETA]
- Secure boot, storage
- CMS Splunk App

We want cloud innovation, while maintaining on-premises infrastructure

Hybrid: The Cisco Advantage

Key Capabilities & Differentiators

Solution	What It Delivers
Cloud innovation without migration	Extend AI, analytics, PSTN, and management from the cloud to your existing UCM environment. Your infrastructure stays. Innovation arrives.
One management experience for hybrid services	Control Hub provides centralized administration, analytics, and troubleshooting across your entire hybrid environment today.
Modernize at your pace	Hybrid is not a waypoint. It's a permanent architecture. Stay hybrid indefinitely, or use it as a bridge to cloud when you're ready. The choice is yours.
Flexibility	Keep core collaboration on-premises for security and continuity, flexibility to move some workloads to the cloud

Hybrid Calling Roadmap

On-Premises Continuity. Cloud Innovation.

AVAILABLE NOW

- Customer Assist
- Cloud PSTN
- Cloud Connected UC

ROADMAP

- AI Receptionist (Q4FY26)
- Cisco PSTN (Q4FY26)
- AI Assistant for UCM (Q1FY27)
- Control Hub Hybrid User Management (Q1FY27)
- Control Hub Alert Center (Q1FY27)
- Real-Time Analytics with AI Insights (Q1FY27)
- AI Canvas (2HFY27)
- Cloud Recording (2HFY27)

Learn More

Webex Calling Customer Assist

Empower employees to assist customers with agent and supervisor experiences delivered through the Webex app

AT-A-GLANCE

AI Receptionist

Always-on virtual receptionist that answers calls, responds to questions, and completes tasks

AT-A-GLANCE

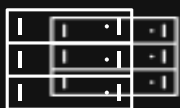

AI Assistant

Make every call more productive with AI-powered tools to generate summaries, identify caller intent, and provide context

BENEFITS OF WEBEX CALLING HYBRID SERVICES?

On Premises Confidence and Stability.

Continue existing investments in UCM with confidence, backed by Cisco's ongoing commitment and continued investment.

Next generation cloud capabilities (on your terms).

Access the latest cloud-powered innovations at your own pace.

Future-Proof Collaboration.

Build a long-term calling strategy that's reliable, stable, and flexible that platform evolves with your business.

AI-driven innovation.

Take advantage of next-generation AI capabilities. Get the best of Webex innovation.

Building pathways to the cloud.

Take the first steps to cloud migration—reducing costs and time-to-market when you eventually move the cloud.

Hybrid Roadmap

Q1FY27

Hybrid User Services

- AI Receptionist
- AI Assistant for Webex App
- Hybrid User
- Cisco PSTN for UCM
- Hybrid Attendant Console
- Webex App Login Survivability

Hybrid Manageability

- AI-Based Anomaly Detection & Alerting
- Real-Time AI Insights
- AI Canvas
- UCM/DI User Management & Migration

Q2 FY27

Hybrid User Services

- AI Assistant for UCM Devices
- Call Recording
- Enhanced Security

Hybrid Manageability

- Hybrid Workspace
- Natural Language Based MACD

Q3FY27+

Hybrid Manageability

- Automated Certificate Management [Hybrid & MT]
- Hybrid Emergency Location Services

Hybrid Platform Updates

- AI Pod Support for Calling
- CUBE / LGW Management [Hybrid & MT]
- 3rd-Party Legacy Integration Support for MT
- Hybrid Switch between Prem & Cloud
- Translator Agent
- AI Assistant Premium
