Hours of development

300+

Security updates

UCM 15 SU4 – UCM, CUC, CER, BE6K/7K

15 SU4 (pre-FCS, target Q3FY26)

Admin Simplicity

- Alternate Hypervisor Support (NFVIS-for-UC, Nutanix)
- Appliance preload w/ NFVIS (~2HCY26)
- CER: M2 Migration Support
- CUC / IM&P: EWS to Graph API Migration
- UCM: NSE fax/modem pass thru support
- Cisco Contact Center SIP Proxy (Q2FY26)
- CUBE,SRST NextGen C8375-E-G2 Crestone platform support (Q2FY26)

Client and User Experience

- Accessibility Improvements

Security and Compliance

- Jabber SDK support with Oauth 1.0 SSO in redirect URI
- Federal Certifications
- Security Improvements

Cloud Enablement

- MS Teams Integration
- Webex Cloud-Connected UC

15SU4 (pre-FCS)

- New Hypervisors!
- Easier Migrations.

Action to take

- Upgrade to SU4 if need ESXi alternatives.

Let the Celebration Begin.....

Platform Strategy

**New Hypervisor plans - Tackle
VMware disruption**

New On-premise Hypervisor Strategy

Roadmap
Subject to Change

Cisco NFVIS-for-UC addresses *UC-centric* use cases

Targets *limited-purpose* needs.

- OK with carving out Cisco Collab, run on mandated Cisco infra. Do what you need to for rest of environment.
- OK with Cisco Collab-only workloads.
- OK with select Cisco hardware only.
- Does NOT require advanced hypervisor features.
- Best fit for UC-centric deployments like appliances, typical customers with <1K-5K phones, separate UC depts in larger enterprise/SP.
- Cisco NFVIS not targeting parity with 3rdparty hypervisor products or solving for “pan-Cisco” needs.

Roadmap
Subject to
Change

- Needs **common infra** for Cisco Collab & all other workloads.
- Needs 3rdparty workload support
- Needs 3rdparty hardware support
- Needs hypervisor-layer advanced deploy/operate/manage features.
- Best fit for **datacenter-centric** deployments like large enterprise/SP with 20Ks-100K's of users or separate admins for applications vs. infra.
- If ESXi off-limits, only way we plan to address general-purpose needs.

NFVIS-for-UC Discovery Checklist

Similar to UCM 15 upgrade
discovery checklist.

Product Support Entitlements

- Ensure **Collaboration Flex** Subscription in place.
- Ensure **NFVIS-for-UC** Subscription in place.

On Prem Applications

- ID your Cisco Apps that will support NFVIS-for-UC.
- Other Cisco/3rdparty/homegrown apps need to stay ESXi or do something else.

Scope of Migration

- Apps will need to upgrade to 15 SU4, with all that entails.
- ESXi > NFVIS-for-UC is a replatform, with all that entails.
- Anything else? (site move, change HW, readdress?)

NFVIS-for-UC Version

- 4.18.x required (FCS will determine min release & compatibility matrix plans).

Hardware

- HW SN in CCW-R must be BE6K/7K or CE1400V.
- CIMC Base PID must show as BE6K/7K or CE1400V.
- Exact components loadout required. HUU/CIMC/BIOS update?

End Points / Devices

- Mainly to see if any gotchas vs. 15 SU4.

Applications Supported on NFVIS-for-UC

NFVIS-for-UC Supported Hardware

Cloud Calling

Webex Architecture

- Control Hub:**
Single pane of glass
Common Identity
Single Sign On
- Endpoints and Clients:**
Rich portfolio of hardware endpoints
Mobile and Desktop Webex App
Pure Browser clients
- Unified Edge:**
Common Edge across portfolio
Access and PSTN connectivity
- Flexible PSTN Options:**
Cisco Calling Plans
Cloud Connected PSTN
Local Gateway ByoPSTN
- Advanced Hybrid Features:**
Hybrid Data Security (on-prem KMS)
Video Mesh
Webex Calling Site Survivability
Local Gateway Enterprise PBX

What is Webex Edge Connect?

Answer: One or more private network peering connections to Webex

Benefits:

- Direct connection to the Webex backbone for services
- A dedicated, consistent, reliable, high-quality secure meeting and calling experience
- Provides protection from the public Internet and the potential threats and attacks associated with the Internet.
- Connectivity through a cloud exchange provider only:
 - Equinix or Megaport
- Options from 200MB to 10 GB connection speed to Webex
 - Able to upgrade speed after initial purchase

PSTN Options for Webex Calling

Premises PSTN

Available in 195+ Markets

Continue using your existing provider

Support remote branch offices

Manage phone numbers Control Hub

Third Party SBC support

Cisco Calling Plans (Cisco PSTN)

Available in the U.S., Canada, Europe, Australia and New Zealand

Single offer through Cisco and our partners

Fully integrated and managed from Control Hub

Cloud Connect for Webex Calling

Available in over 65 countries

Select from 30+ world-class Cisco-certified providers

Choose providers on a site-by-site basis

Manage numbers in Control Hub

Cloud Connect for Webex Calling

Survivability for Webex Calling and Dedicated Instance

Survivable Appliance

Works just like SRST does now

Supports both the Webex App and Devices

Supported on Physical and Virtual ISR's

No configuration to manage but Dial Plans

Enhanced Survivability Node

With Dedicated instance, fully operational Subscriber when Active

Supports all typical CUCM

Fully Managed by the Cloud, 8 Nodes supported per cluster

Network Path First

Calling works over secondary Internet connections

Calls will heal and re-connect when primary outage happens

Webex Calling supports Highly Latent Environments

Site Survivability Multiple Locations per Gateway

Roadmap
FY26Q1
Subject to
Change

- Allows customers the ability to map multiple smaller Webex Calling Locations to a single Site Survivable Gateway (SGW)
- Smaller Locations allow flexibility in grouping users to specific Calling permissions, MoH, Device Templates, PSTN etc
- Removes the 1-Location to 1-SGW mapping requirement from before
- Enables better gateway resource utilization, by allowing smaller Locations (e.g. within a same campus or close proximity) to use a single gateway for failover.
- Reduced CapEx with a smaller set of gateways
- Lesser admin overhead of managing multiple gateways

Custom Roles in Control Hub

Ability to define administrative roles based on permissions

Available
Now

Create your own admin role and assign specific permissions to the role:

- User Management
- Device Management
- Calling
- PSTN
- Compliance Officer
- And more permissions to come (continued phased delivery)

The screenshot shows a web browser window with the URL `admin.webex.com/manage-users/admin-roles`. The page title is `usersPage.rbac.createRole`. The main content area is titled "Step 2: Add permissions" and includes the instruction "Select permissions directly from the list below or quickly filter it by keywords." Below this, there are two columns: "Available permissions (6)" and "Added permissions (4)".

Available permissions (6):

- Search permissions by keywords (input field)
- View Users (+)
- Device Management** (+)
 - View workspace insights (+)
- Calling** (+)
 - Configure Calling settings (+)
 - Configure Calling locations (+)
- PSTN** (+)
 - Configure PSTN service (+)

Added permissions (4):

- User Management** (-)
 - Manage Users (-)
- Calling** (-)
 - Configure Calling features (-)
 - Configure Calling users (-)
 - Configure Calling workspaces (-)

At the bottom right, there are "Cancel" and "Save" buttons.

Webex Calling Hybrid

Cloud

Webex Calling

Simplifying the transition to the cloud

Hybrid and advanced calling features maximise ROI and flexibility – no 80/20 rule

Centralised enterprise dial plans

- Configure advanced Enterprise dial plans to optimise on-network call routing

Trunks and route groups

- Geo-redundant routing policies for enterprise trunks
- Scale call traffic to the PSTN using geo-redundant trunk groups across enterprise sites

Media optimisation

- ICE for calling media
- Regional media for cloud connected PSTN

Centralised calling analytics

- Usage, call quality*

Hybrid-migration journeys from on-prem PBX to native cloud site by site, or user by user with full collaboration suite

Webex Cloud-Connected UC & Hybrid Services

Webex Cloud-Connected UC

A suite of Webex® cloud services that provide enhanced business and operational insights to improve administrative productivity

For customers who:

- Want the centralized administrative workflow experience of the cloud, while keeping their UC services on-premises
- Need a single global view to manage on-premises UC, along with any Webex cloud, or hybrid services
- Desire efficient, cloud-based admin services (delivered by partner) for an on-premises CUCM deployment
- Ease my journey on-prem → "hybrid" → cloud
 - CCUC-powered "migrate to Webex" features.

See [CCUC System Requirements](#) and [CCUC Network Requirements](#)

Webex Cloud-Connected UC (cont'd) – Key Features

Calling features you need, available anywhere

Common Call History for UCM Calling

Available
Now

When users are not signed in Webex app calls placed/received on other devices are not seen. The result is inconsistency across the devices.

With this feature, users will get synchronized call history on Webex app registered to UCM.

IT admin can turn on required options through CCUC on Control Hub.

Specific Platform releases/dates:
Webex App on Desktop and mobile

Pre-requisite:

- Webex Cloud-Connected UC (CCUC)
- UCM 14 SU4 / 15 SU2
- Webex App 44.6

Recent Dial-Plan Enhancements

Webex Calling Dialing Habits in General

- Extension dialing: 2-10 digits (default 4)
 - Inter- and intra-site; inter-site requires unique extensions
- ESN (Location routing prefix + user extension) using an optional location code: up to 7 digits
- +E.164
 - Telephone numbers defined in the Webex Calling system. Always resolvable by +E164 dialing
- PSTN
 - PSTN destinations defined by pre-loaded Country Dial Plans
 - Optional outside steering digit (outside access code, OAC) to avoid overlaps between PSTN and enterprise dialing habits

<https://help.webex.com/en-us/article/757iyo/Dial-plans-by-country>

Outgoing Call Permissions – By Pattern

- Policy (allow, block, auth. code, auto-transfer number) per pattern
- Up to 500 patterns per location/user/workspace/virtual line
- Provisioning APIs for locations, users, workspaces (virtual line APIs tracked as separate initiative)
- Bulk management for locations, users (workspaces and virtual lines don't have bulk management; separate initiative)
- Permissions by pattern take precedence over permissions by type
- Note: call types other than “internal” always block for user in Cisco Calling Plan location w/o OCP regardless of any pattern
- For external destinations pattern match is tried twice: before/after translation according to national numbering plan
 - +E.164 patterns can be used to apply policy regardless of how the destination was dialed
 - Non +E.164 patterns can be used to apply different handling depending on how the number was dialed
- As outgoing call permissions are applied for all routing tree outcomes, policy can be applied to all call types (... other than emergency) .. even internal

Permissions by digit pattern

Manage the permissions by digit pattern for this user.

☐ Location and custom settings
The digit patterns configured here for this user are applied first. If no matches found then the location's digit patterns are applied. To manage the digit patterns for this user's location <BLRHQ>, go to [location settings](#).

☒ Custom settings only
Only the digit patterns configured here for this user are applied.

Name	Pattern	Permission	Allow transfers / forwards ⓘ	
Digit Pattern 1	469XXXXXX	Allow	☒	
Digit Pattern 2	+7!	Block	☒	
Digit Pattern 3	510[3-6]XX	Block	☒	

Enterprise Dial Plan

Translation Patterns

- Simplified Management of call routing for outbound calls to support use cases such as operator dialing, abbreviated/short number dialing, and number translation needed for routing calls to PSTN
- Consistent Experience of users across the organization
- Support for commonly used wildcards is provided to simplify configuration and create efficient translation patterns with ease.

Verify Call Routing Tool

- Verify Call Routing Tool supports translation patterns
- Final output will have information about matched translation patterns

[Trunk](#) [Route Group](#) [Dial Plans](#) [Verify Call Routing](#) [Zone](#) [Trusted Network Edge](#) [Translation Pattern](#)

Verify How Calls Are Routed

Verify your call routing by choosing a cloud user or premises trunk and entering a number or URI that a user would dial. The routing result shows how a call will be translated (assuming that your on-premises configuration is correct).

Cloud PSTN for UCM

Roadmap
FY26Q2
Subject to
Change

- Connect Cloud Connected PSTN Providers for UCM
- 40+ cloud connect PSTN providers to choose from
- Lower costs - no need to invest in or maintain local PSTN gateways or circuits
- Centralized control and administration of PSTN services across multiple locations
- Supported Calling Scenarios
 - On-Net and Off-Net Calling
 - Calls to and from all Webex Calling users, devices and virtual services to users behind the trunk
 - Emergency calling
 - Redundancy and Failover support
- Cisco Calling Plans (future)

Configurable retention and Legal Hold for native Call Recording

- Webex Calling add-on for flexible policy that allows 7 days to 3600 days* of recording retention and Legal Hold
- Retention policy is at the organization level for all recordings
- Option for “Deleted Recordings” to follow retention policy
- Webex Control Hub to show the current storage used by recordings
- Add On offer, work in Progress
- Add On Option to purchase additional storage (over the free 100GB storage)
- With Webex Call recording, there is a new options to record all emergency calls.

Call recording

Retention time period for Webex Call Recordings, transcripts, summaries and action items.

Enter a custom retention time between 7 and 3600 days.

days

Deleted recordings

After a call recording is deleted by the owner or admin, the deleted recording will be:

- ☒ Purged after 30 days
- ☐ Follow the retention policy ⓘ

Webex Consistent Branding of Voicemail, Voicemail transcript and Fax

Roadmap
FY26Q1
Subject to
Change

- Consistent look and feel in the email notification that aligns with Webex meeting and messaging by including voicemail, transcription, and fax notification
- Customers and partners can customize the branding of emails by customizing elements like the “logo”, "Contact Us" link, and "Terms of Service
- Reinforces trust and brand recognition for users

Configurable Storage Region for Call Recording and Voicemail

Roadmap
FY26Q2
Subject to
Change

- Support for Data Residency and Compliance by enabling Webex calling administrator to choose where call recording and voicemail data is stored.
- Regions include Australia, Canada, Germany, India, Japan, Saudi Arabia, Singapore, United Kingdom, United States.
- Webex calling administrator selects the default storage region at the organization level with the option to override at specific locations
- For customers in India and Multinational Corporations with Branch offices in India, the storage location is set to India and can not be changed for compliance reasons.

Advanced Auto Attendant: Speech enabled prompts

Roadmap
FY26Q1
Subject to
Change

Effortless customer navigation using voice for intuitive and efficient menu selection

- Customer calling into the Auto Attendant can use voice commands to drive the menu
- Natural interaction compared to pressing keys
- Administrator to have the ability to configure potential trigger words for each menu option

Advanced Auto Attendant: Text to Speech enabled Announcement Repository

Roadmap
FY26Q1
Subject to
Change

Dynamic prompts using Text to Speech

- Enable Announcement Repository to generate announcements using TTS
- Works like a recorded wav file, with no overhead to record
- Can be referenced according to hierarchy by any entity using Announcement Repository
- Features moving to announcement repository will automatically get the capability of TTS
- Updates to the announcements can reflect to all referenced entities at the same time

Calling AI

Audio Intelligence

Hear and be heard, anywhere, on any device

Noise removal

Removes noise from the device side of the call.

Available on the Cisco 8875 IP phone and Cisco headsets

Noise removal and optimize for my voice

Automatically removes noise from the Webex Calling side of the call.

Available on the Webex App.

HD Voice

Remove noise from an external, non-Webex user's side of the call with one click.

Improve richness and clarity of speech with wideband audio

Summaries for recorded calls

- User access to call recording, transcription, AI-generated summary and action items on the Webex application.
- Comes with Control Hub toggle to control user's access to post call recordings, summary, transcript and action items.
- Available via APIs.
- Data storage regional setting available on Control Hub – org and location level.

Closed Captions and Live transcription

Available
Now

- Closed captions in Webex Calling without escalating the call into a meeting
- Rolling closed captions/transcription in the side panel of Webex in-call-window

Create

AI Assistant for Calling

Roadmap
FY26Q1
Subject to
Change

- AI assistant allows Webex app user to summarize the call and provide action items in real-time.
- Using the AI assistant makes the call summary, transcript and action items available to users, post-call as well.
- Indicators on call history to show availability of call summary, transcript and recordings

AI Assistant for Calling: Share Summary on transfer or conference

- When transferring or conferencing a call, the Webex app user can share the summary of the call so far with the new participant.
- User would be allowed to edit the summary before sharing it.
- The new participant will get a short summary of the original call within their incoming call toast notification.

Caller Intent

Roadmap
1HCY26
Subject to
Change

Give employees context upfront for faster, smarter conversations.

- Displays a brief summary of the caller's intent in the incoming call notification
- Leverages enterprise data - AI Receptionist interactions, prior conversations or call transfer history – to determine possible need
- Empowers employees with actionable context before answering calls, improving preparation and first-call resolution

Requires Premium AI Add-On

Suggested Responses

Help staff respond faster and more effectively with real-time guidance.

- Context-aware response suggestions appear in the Webex app based on the customer's questions
- Pulls answers from your organization's knowledge base and support content
- Equips staff with timely, relevant information to keep conversations efficient and on track

Roadmap
1HCY26
Subject to
Change

Requires Premium AI Add-On

Prep me for my next call

Roadmap
1QCY26
Subject to
Change

Build stronger relationships and improve call outcomes

- **Comprehensive profile summary:**
Instantly generate a concise profile of the individual giving you clear understanding of the contact
- **Engagement history:** Surfaces previous interactions, such as voicemails, calls, messages and meetings so you can pick up where you left off
- **Agenda & talking points:** Suggest personalized talking points to make the call more impactful
- Available with **Calling home page** in the Webex app

Requires Premium AI Add-On

AI Speech to Speech Translator

Roadmap
1HCY26
Subject to
Change

Unlock global productivity – live translation for better inclusion and decision making

- AI-powered live speech translation so users can **hear and talk in their preferred language**
- Speech translation occurs **in real time with no lag** to power conversations between users speaking different languages

Requires Premium AI Add-On

Agent experience in Webex App

- Set availability and join/unjoin from call queues
- Realtime views of call queues they are part of
- Screen pop for call queue calls
- Available on desktop or mobile devices

Supervisor Experience in Webex App

- Manage agents from within the Webex App
- Access to real time and historical data on agents and queues
- Manage availability of agents and join/unjoin status
- Silently monitor agents

Unified Administration Control

- Administer Webex Customer Experience from Control Hub
- Key details at a glance
- Manage call queues, supervisors and agents
- Access call queue analytics

Webex Calling Customer Assist

A modern, AI-powered experience delivered natively in the Webex app

NEW

Pre interaction

Analysis & Follow-up

Employee Interactions

*Add-on

\$30 / user / month – includes Webex Calling Professional License

Customer Assist: Download wrap-up reports from Webex App

Available
Now

- Supervisors can download the data for agent wrap-up directly from the Webex App, for further analysis.
- Supervisors no longer need to log into Control Hub to pull this report.

Call Queue Recording

Policy based call recording for call queues

- Recording support for both inbound and outbound calls by an agent
- Admins can configure queue level policy for calls recording in Webex Control Hub
- Admin controls for automatic recording and with pause/resume
- Must have compliance role to view, download recordings in Webex Control Hub
- (Future) Access to recordings for Supervisor in Webex App

Built-in Voicemail for Group Calling (e.g. Call Queue, Hunt Group)

Roadmap
FY26Q1
Subject to
Change

- Voice mailbox native to Call Queue, Hunt Group and Auto Attendant features
- Simplifies voicemail setup for group features by removing the need for a separate Voicemail Group and a separate telephone number or extension for the voicemail group
- Introduces the voicemail access membership; members automatically get visual voicemail experience on Webex App
- Administrator can configure the line key (as voicemail service line) on desk phone for MWI and voice portal access

App user can use filter to select the mailbox. Default is all mailboxes

Topic Analytics

Roadmap
1HCY26
Subject to
Change

- Analyze customer conversations at scale
- Gain visibility into the topic of customer calls
- Proactively prepare staff for calls and identify opportunities to reduce call volume
- Optimize customer experience and drive more efficient interactions

Agent activity report

Roadmap
FY26Q1
Subject to
Change

A report that provides the detailed agent activity for the queues and the status they are in

- Report available for administrator in Control Hub for agents across the org
- Session wise details of agent’s activity
- Figure out how long an agent has been available, unavailable

Outbound calls visibility to Supervisor

Roadmap
FY26Q1
Subject to
Change

Complete call visibility to Supervisors

- View outbound calls made by the agents in the Monitoring dashboard
- Invoke the same functions such as monitoring, coach and barge on outbound calls

The screenshot displays the Cisco Customer Assist interface. At the top, it says "Working from home" with a location icon. Below this, the "Customer Assist" header is visible, with tabs for "Agents" and "Queues". The "Monitoring" tab is selected, showing a search bar and "Displaying 16 agents". A table lists the agents with columns for Agent name, Agent state, Agent state duration, Queue, Contact, Contact status, Time in contact, and Actions. The agents listed are Austen Jones, Darren Owens, Clarissa Smith, Isabelle Brennan, Kevin Woo, Kristin Stone, Matthew Baker, and Marise Torres. The bottom of the screen shows "Call Settings", "L1 Sonali Pritchard", and "Call pickup" options.

Support multiple DNIS for Call Queues

Roadmap
FY26Q1
Subject to
Change

Efficient Multi-Number Support:

- Associate a single queue with up to 100 phone numbers in addition to the primary number, enabling seamless call handling across multiple lines
- **Customized Caller Experience:**
 - Customize announcements per number
 - Provide agents with critical context (Queue name and number of DNIS dialled)
- **Scalability:**
 - Support multiple businesses or departments using a single queue, streamlining operations

The screenshot displays the 'webex Control Hub' interface for 'Call Queue 1' (Location: Chicago). The left sidebar shows navigation options: Overview, Alerts center, MONITORING (Webex experience, Analytics, Troubleshooting, Reports), MANAGEMENT (Users, Workspaces, Devices, Apps, Account, Organization settings), and SERVICES (Messaging, Meetings, Calling, Contact Center, Connected UC, UCM Cloud, Hybrid). The 'Calling' section is selected.

The 'Call Queue 1' settings page shows the 'Overview > Phone numbers' section. It includes a 'Primary number' field with a dropdown menu showing '+13267895678' and a 'Text Input' field for the extension. A toggle switch 'Allow agents to use call queue number as caller ID' is turned on.

The 'DNIS' section is titled 'DNIS numbers' and includes a search bar 'Search for and add numbers using the lookup field. There is a maximum limit of 10 numbers.' Below the search bar is a table with 3 numbers:

Number	DNIS name	Extension	Ring pattern
+13267895678	Default	Default	Short-short-long
+13067895678	Default		
+14267895678	Default		

A 'Remove all' button is located to the right of the table. Below the table is the 'DNIS Settings' section with two toggle switches: 'Display DNIS number to agent when presenting call' and 'Display DNIS name to agent when presenting call', both of which are turned on.

The 'Announcement settings for DNIS' modal is open, showing options for 'Welcome message', 'Estimated wait message', 'Comfort message', 'Music on Hold message', and 'Call whisper message'. Each message type has a toggle switch and a text input field. The 'Welcome message' section includes a 'Welcome message is mandatory' checkbox and a note: 'If checked, a welcome message is played to every caller. If unchecked and agents are available, the caller does not hear the welcome message. Welcome message type. You can add up to 4 announcements in the settings after the setup.' The 'Reset to queue settings' button is at the bottom right.

Call Sentiment for Supervisors

Roadmap
FY26Q1
Subject to
Change

Proactive agent monitoring powered by AI

At-a-glance call sentiment
analysis for proactive monitoring
of agents

- Call sentiment as part of agent monitoring dashboard
- Easy filter to prioritize monitoring negative sentiment calls
- Expanded inline summary of the call for understanding the context

Auto Answer for Call Queues

Roadmap
FY26Q2
Subject to
Change

Automatically answer calls from call queue

- Customer Assist agent to have the ability to automatically answer calls, set by the admin
- Admin can set the policy for auto answer at a queue level, with an appropriate delay
- Agent will have the ability to select preferred device for auto answer from Webex App or User Hub

Multiline support for Customer Assist Agents

Roadmap
FY26Q2
Subject to
Change

Customer Assist Agents can be assigned a second line for joining call queues

- Agent can easily select which line to use for outbound calls.
- Better separation of call detail, call history for the agent's personal calls and calls associated with the queue.
- Clear notification for incoming calls to the agent's personal number vs. incoming calls to the queue.
- Call reports show clear separation of calls on behalf of the agents call queues vs. personal calls made by the agent.

The screenshot displays the Cisco Webex Control Hub interface. On the left is a navigation sidebar with sections: Overview, Alerts center, MONITORING (Webex experience, Analytics, Troubleshooting, Reports), MANAGEMENT (Users, Workspaces, Devices, Apps, Account, Organization settings), and SERVICES. The main content area shows the 'Users' page for 'Ben Wallace' (Active, bwalace@cisco.com, Sales Senior VP, San Jose). The 'Calling' tab is selected, showing a 'Numbers' section with a table for 'Directory numbers'. A modal titled 'Create secondary line' is open, containing the following fields: First name (Matthew), Last name (Baker), Display name (Matthew Baker), Location (Seattle), Directory number (a dropdown menu), Phone number (+12147897456), and a section for 'And / or' with an Extension (2222). A 'Create' button is at the bottom right of the modal.

Call Queue call details report

Roadmap
FY26Q2
Subject to
Change

- A report that provides the detailed view of the calls received in the Call Queue
- Report available for administrator in Control Hub for agents across the org
 - Report with the call details with the end status
 - Easily figure out all the abandoned calls to the call queue(s)
 - Track the call to an agent who answered the call
