

Webex Cloud- Connected UC

Supercharge your on-premises calling
with the power of cloud

Webex Calling PM Team

Jul 2025

Customer challenges – On-Premises UC deployment

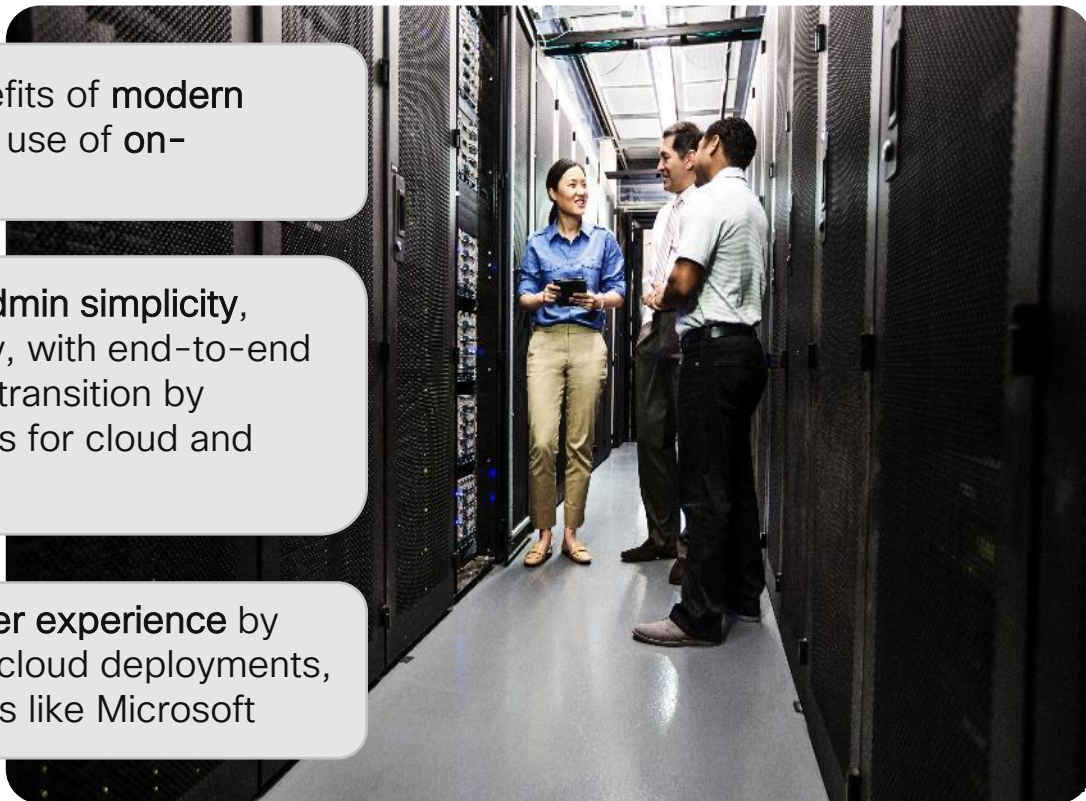

Need tools that provide benefits of **modern cloud experiences**, yet allow use of **on-premises calling service**

Need solutions that brings **admin simplicity**, provide multi-cluster visibility, with end-to-end workflows and enable cloud transition by providing single pane of glass for cloud and on-premises deployments

Need solutions to improve **user experience** by connecting on-premises and cloud deployments, work better with 3rd party apps like Microsoft

Customer administration needs

- Cost effective, cloud managed admin experience, with multi-cluster visibility through single pane of glass
- Improved admin experience for operation workflows such as ease of certificate management, enhanced provisioning workflows, simple migration tools

- Better visibility into the network deployment and usage through analytics, deployment insights
- Insights to trends and KPI measures for quality of service
- Usage reports for broader communication, within and outside organization

- Automated, end-to-end workflows for frequent troubleshooting scenarios
- Diagnostic insights, log collection and analysis results
- Visual call tracing, with hop-by-hop troubleshooting details

End User needs

- Improve disjointed user experience between on-premises and cloud deployment
 - Presence aggregation and synchronization across different endpoints
 - Synchronize call history across different endpoints

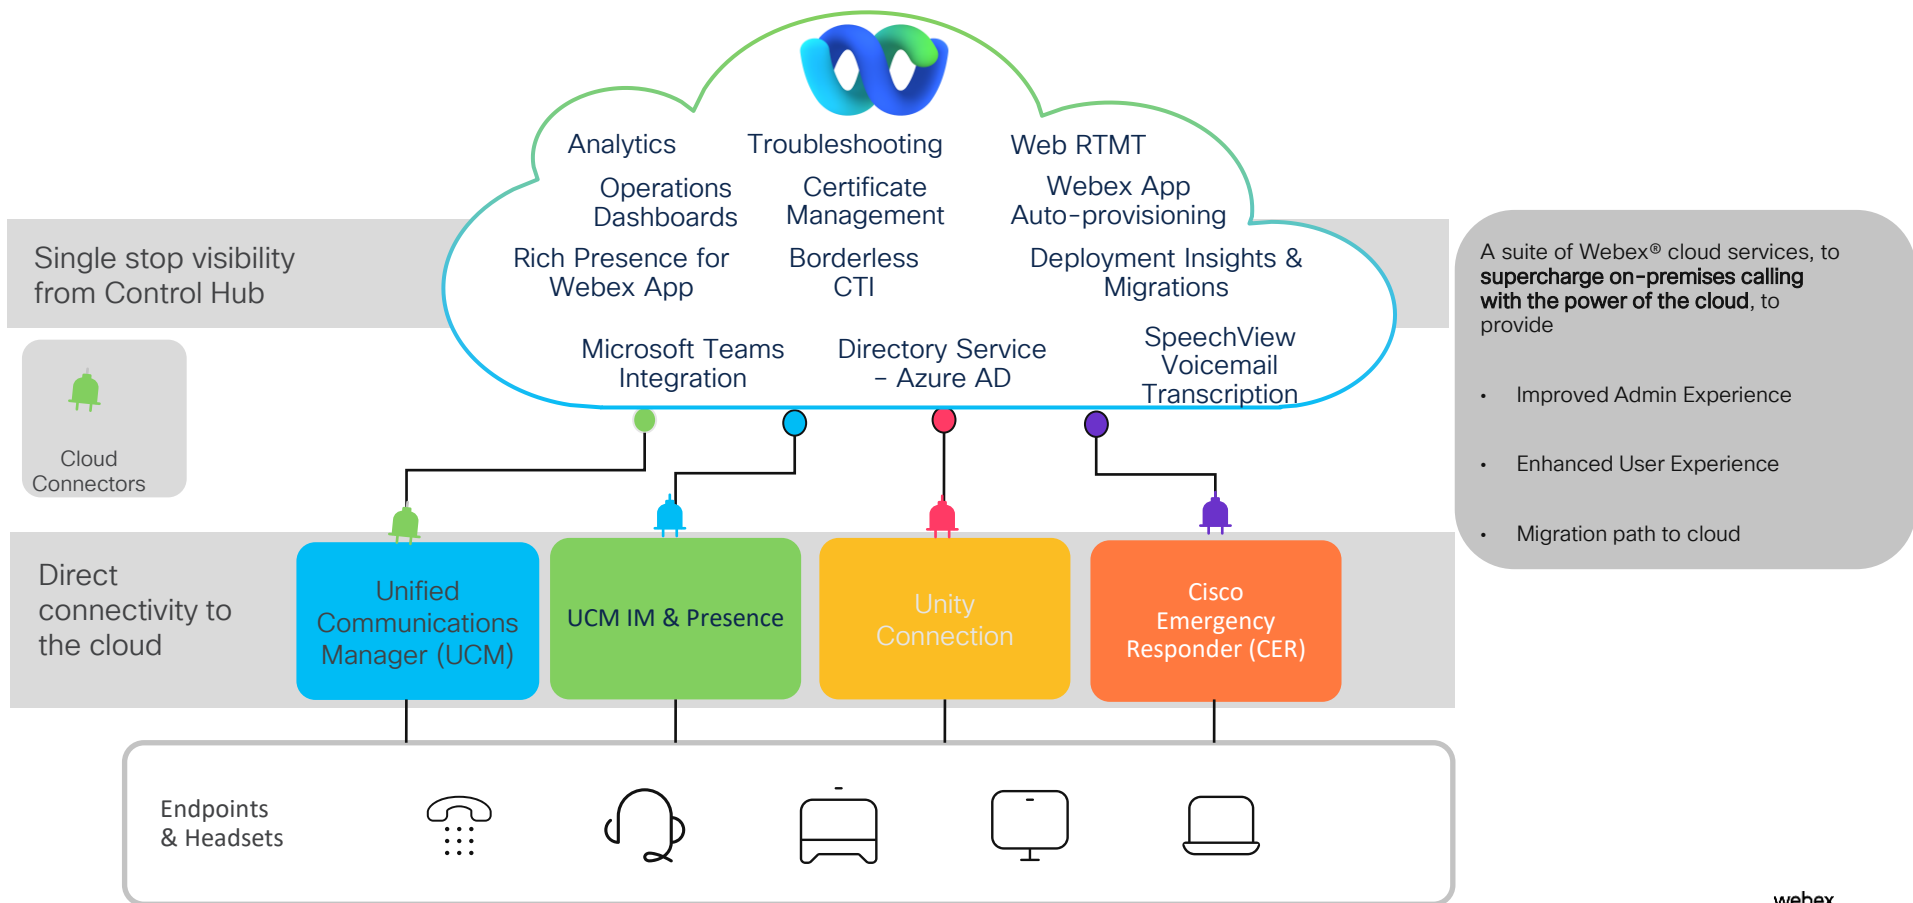

- Seamless user experience between Microsoft Teams and Cisco calling
 - One stop shop for Cisco calling within Microsoft teams
 - Better orchestration of presence status between the two apps
 - Ability to easily make and receive calls using Cisco even outside of Microsoft Teams

- Enhance remote working ease by reducing dependency on VPN connections
- Need for voicemail transcription

Webex Cloud-Connected UC

Solution benefits for customers

Improved User Experience

Enhances the user experience through rich presence, providing, providing simplest way to integrate Microsoft Teams Messaging and Cisco

Centralized Administrative Workflow

Customers can experience the centralized administrative workflow of the cloud while keeping their UC services on-premises

Efficient Cloud-Based Services

Offers efficient, cloud-based managed services for on-premises UCM deployment.

Centralized workflow management for certificate management, troubleshooting, and Web RTMT

Bridge to migrate on-premises solutions to Webex Calling

Simplifies and augments configuration, provisioning, monitoring, and reporting features for Cisco's unified collaboration on-prem deployments, enabling a seamless transition to cloud services.

Security, privacy and reliability

Industry leading Webex security and privacy, with disaster recovery and redundancy

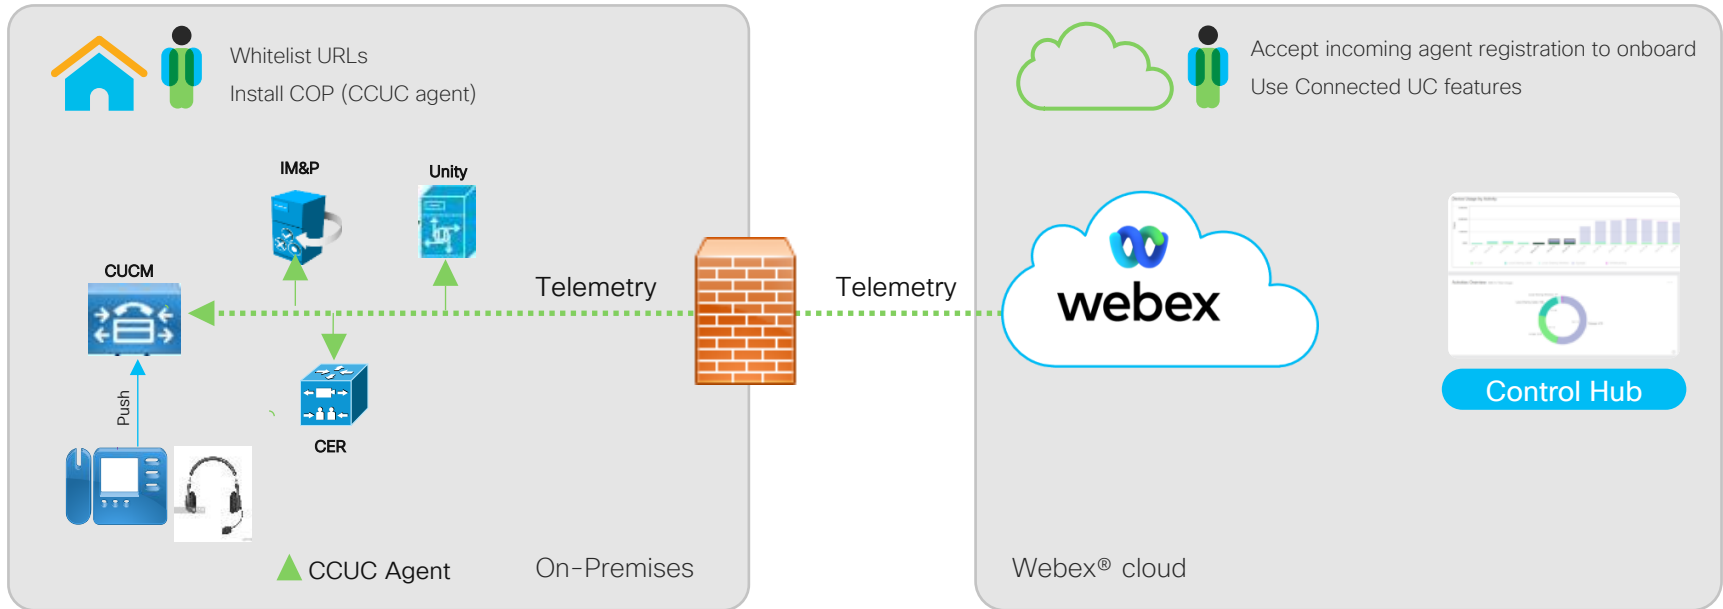

Security and privacy considerations

- All data is encrypted at rest and in transit
- Webex Identity Services infrastructure is used to authenticate and authorize cloud connectors to a specific Control Hub organization
- All the privacy related data sent by CCUC is outlined in Privacy data sheet maintained at the Trust Portal (trustportal.cisco.com)

Webex Cloud-Connected UC deployment

Easy onboarding of clusters guided through Control Hub

Supercharged Experiences

Supercharged Experiences

Supercharge your on-premises calling with the power of cloud

Improved Admin Experiences

1. Analytics
2. Operational Metrics
 - a) Operations Dashboard
 - b) Troubleshooting
 - c) Web RTMT
3. Certificate Management
4. Touchless Provisioning for Webex App
5. CCUC Directory Service - Azure AD
6. Migration

Enhanced User Experience

1. Rich Presence for Webex App
 1. Deskphone on call status to Webex App
 2. DND sync between deskphone & Webex App
2. Centralized Call History
 1. Deskphone call information to Webex App
3. Borderless CTI
4. Microsoft Teams Integration
 - a) Call History - (2)
 - b) Presence Sync - Webex <-> Microsoft (1)
 - c) Voicemail (CUC)
5. SpeechView Voicemail Transcription

Operational Metrics – Ops Dashboard, Web RTMT, Troubleshooting

The screenshot displays the Webex Control Hub interface. On the left is a navigation sidebar with categories: Groups, Locations, Workspaces, Devices, Apps, Account, Security, and Organization Settings. Under Organization Settings, there are sections for SERVICES (Updates & Migrations, Messaging, Calling, Vidcast, Connected UC, Hybrid) and a list of nodes. The main content area shows the configuration for a 'StandAloneCluster' with a 'Cluster Group Name' and a list of 'Services'. A 'Service Management' modal is open in the center, listing various services with toggle switches. The 'Operational Metrics' service is currently enabled, while all others are disabled. The modal includes a 'Cancel' button and a 'Submit' button.

Operations Dashboard – UCM

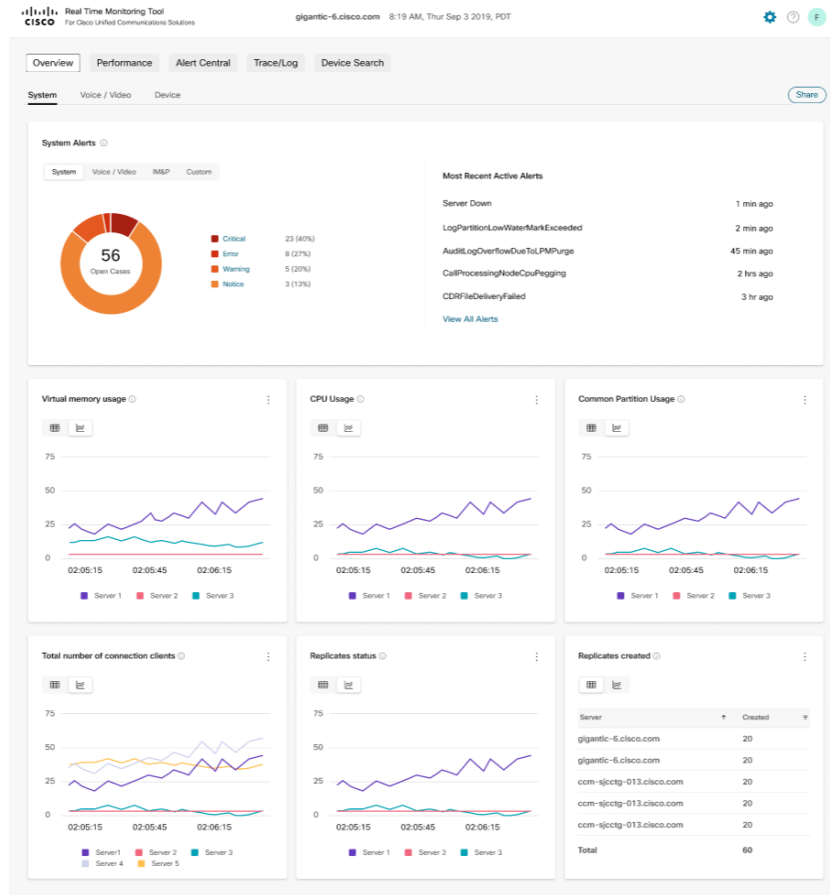

- The Operations Dashboard gives a **near** real time view of on-premises network call traffic
- Serves as a launchpad for Web RTMT
- Provides a view of the previous 1-hour call status (successful, failed, dropped) and call audio quality (good, acceptable, poor) for the top 5 UCM clusters in the network.
- Supported Releases: 12.5 onwards

Web RTMT – UCM, IM&P, CUC

Simplify and enhances the administration and troubleshooting experience

- Web-based application with modern look / feel to monitor real-time behavior of your system components in UCM, IM&P and Unity Connection.
- Access via Webex® Cloud-Connected UC Operations Dashboard to monitor and troubleshoot the UC infrastructure at an individual cluster-level.
- Unlike classic RTMT, no dependency on Java and OS platform
- Supported Releases: 12.5 SU4 and 14 onwards

Troubleshooting - UCM

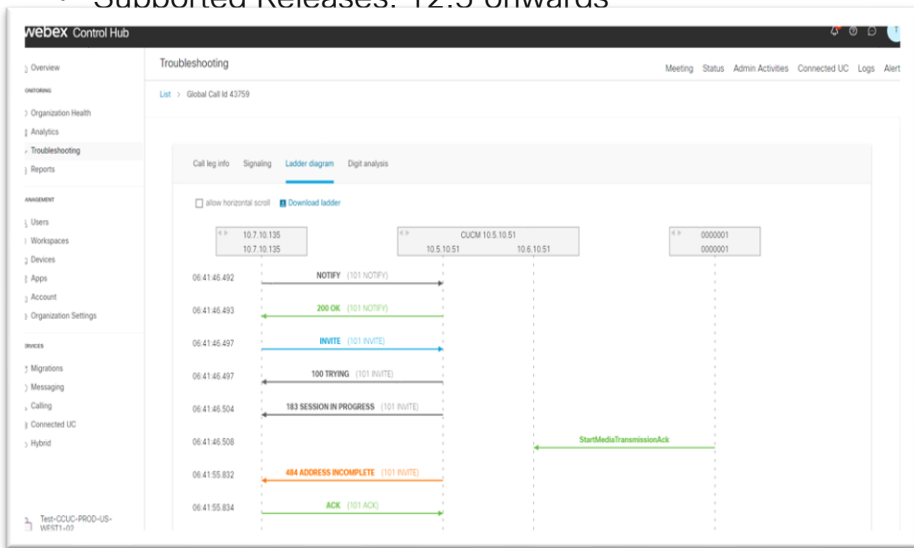

- Collect call logs and analyse them at the click of a button.
- Drill down into call signalling issues with help of SIP ladder diagrams and more.
- Supported Releases: 12.5 onwards

Certificate Management – UCM, IM&P, CUC, CER

- Single place to view and manage certificates of CUCM, IM&P, Unity Connection and CER across multiple clusters
- Easily distribute certificates across trust stores within a cluster and across the clusters
- Quick dashboard to view expired or about to expire certificates
- Insights for certificate consolidation and out of compliance
- Supported Releases: 12.5 onwards

The screenshot shows the 'Certificate Management' page in the webex Control Hub. It features a sidebar with navigation options like Organization Health, Analytics, Troubleshooting, Reports, Users, Workspaces, Devices, Apps, Account, and Organization Settings. The main content area displays a table of clusters with columns for Cluster Name, Status, Product, and Profile. The status column uses color-coded indicators: red for 'Expired' and yellow for 'Expiring Soon'.

Cluster Name	Status	Product	Profile
StandAloneCluster - ccm218	Expired (1)	Unified CM	12.5 Custom
RemoteCluster - ucm2-pub.cisco.com	Expired (2)	Unified CM, UNKNOWN	STANDARD

Touchless Webex App Provisioning for UCM

User can self-provision the Webex® App in UCM

- No admin intervention required
- Avoids over provisioning of devices for Webex App
- Minimizes impact on cluster scale & licensing
- Control Hub based policy control
- Enable Jabber® to Webex App migration
- Supported Releases: CUCM 12.5 onwards
- Webex App version is 41.12 and higher

Webex Cloud-Connected UC (CCUC) required

Unified CM Settings

- Allow Unified CM registration without trusted certificate
- When enabled, the security of the Unified CM connection is not authenticated. We recommend that you only use this setting in a lab environment.
- ☒
- Allow auto-provisioning for Webex**
- Turn on for automatic device provisioning when a Unified Communications Manager user signs in with their registered email address. You can also change this through individual user settings.
- ☒
- Allowed device types**
- Allow auto-provisioning Webex app for desktop, mobile, or both.
- ☒ Desktop and mobile
- ☐ Desktop only
- ☐ Mobile only
- Delete inactive auto-provisioned devices**
- ☒ Don't delete inactive devices
- ☐ Delete after days

Cloud-Connected UC Directory Service – Azure AD

The screenshot displays the webex Control Hub interface. On the left is a sidebar with navigation options: Groups, Locations, Workspaces, Devices, Apps, Account, Security, and Organization Settings. Below these are service categories: Updates & Migrations, Messaging, Calling, Vidcast, Connected UC (highlighted), and Hybrid. The main content area shows a configuration page for a cluster named 'StandAloneCluster - e4cucm.hcsent4.ciscolat'. A 'Service Management' modal is open in the center, listing various services with toggle switches. The 'Directory Service' is the only one that is enabled. The modal also includes a 'Cancel' button and a 'Submit' button.

Cloud-Connected UC Directory Service

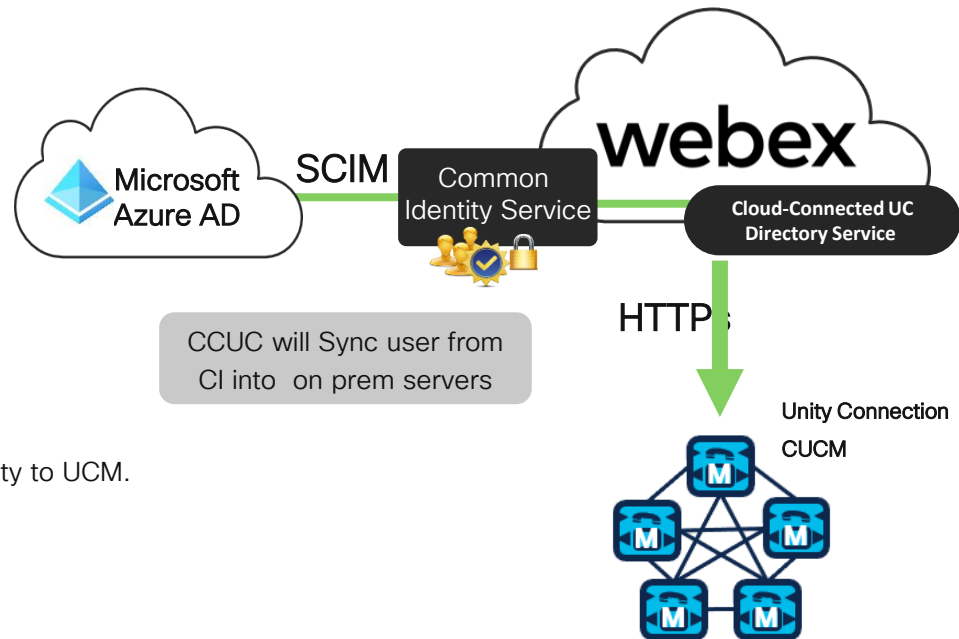

Admin simplicity

Benefits

- Ubiquitous Identity and Access management while
- moving directory to Cloud
- Reduction in TCO
- Enables migration options – incremental to Cloud native

Key Features

- Seamless full sync from Cloud Directory / Webex Common Identity to UCM.
- Periodic sync every 24 hours.

Supported Releases:

- UCM 11.5(x), 12.5(x) and 14(x)
- No LDAP based Auth support

Deployment Insights - Migrations

The screenshot displays the Webex Control Hub interface. On the left, a sidebar contains navigation links: Locations, Workspaces, Devices, Apps, Account, Security, Organization Settings, and a SERVICES section with Updates & Migrations, Messaging, Calling, Vidcast, Connected UC, Hybrid, and Test-CCUC-PROD-US-WEST1-02. The main content area shows the 'StandAloneCluster' configuration page with fields for Cluster Group Name, Services, Node Name, and IP. A 'Service Management' modal is open in the center, listing various services and their status. The modal includes a warning that changes will take time to take effect. The 'Deployment Insights' service is currently enabled, while all others are disabled. The modal has 'Cancel' and 'Submit' buttons at the bottom.

Rich Presence

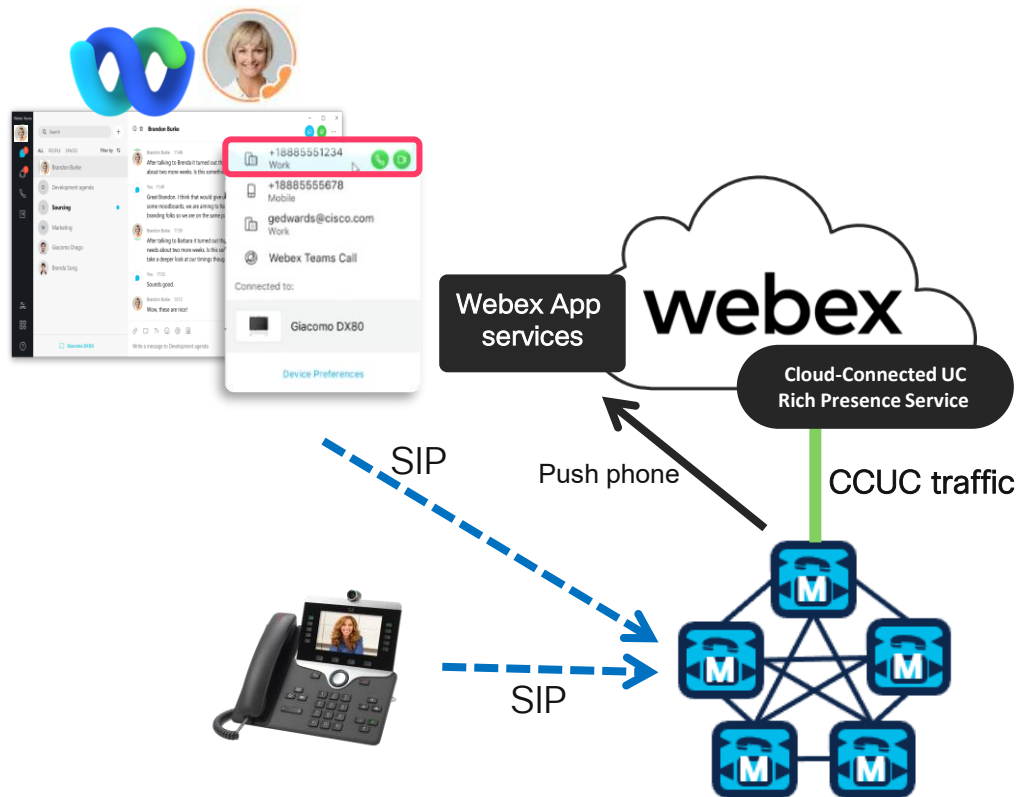

End user experience

Benefits

- Enables users to determine best communication mode
- Shows accurate real-time presence information of your contact list

Key Features

- Integrates user's IP phone off-hook/on-hook status with Webex® App presence
- Desk phone as shared devices or multiline as shared device supported

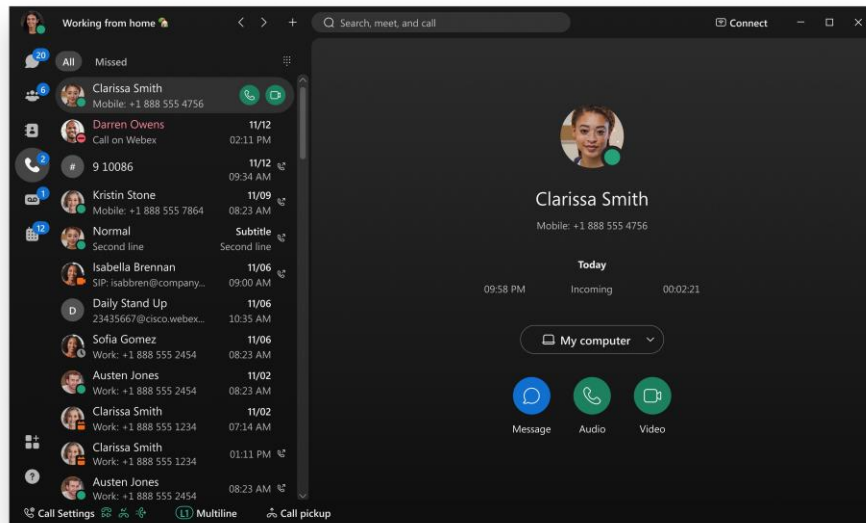

Supported Releases

- Cisco UCM: 12.5 SU4 onwards, 14 onwards
- Webex App: all releases

DND Sync

Sync DND from Webex app to IP Phone and vice-versa

- Sync User's IP phone DND status with Webex app and vice-versa
- DND status is cleared on all devices when DND expires
- Supported on CTI mode and Shared lines
- Webex Cloud-Connected UC (CCUC) required
- Supported Releases:
 - Cisco UCM: 15, 12.5 SU7+, 14SU3+
 - Webex app: all releases

Centralized Call History - UCM

The screenshot shows the Webex Control Hub interface. On the left is a navigation sidebar with sections: Locations, Workspaces, Devices, Apps, Account, Security, Organization Settings, SERVICES (Updates & Migrations, Messaging, Calling, Vidcast, Connected UC, Hybrid), and a top bar with a menu icon, 'webex Control Hub', an 'AI-powered smart search' bar, and user profile icons. The main content area is titled 'StandAloneCluster -' and contains a table with columns 'Cluster Group Name', 'Services', 'Node Name ^', and 'IP'. The table lists three nodes: 'imp3-sub-1b.ciscoctg.com', 'imp3-pub.ciscoctg.com', and 'ucm3-pub.ciscoctg.com'. A 'Service Management' modal is open in the center, displaying a list of services with their status (Enabled/Disabled) and a toggle switch. The 'Centralized Call History' service is currently 'Enabled'. At the bottom of the modal are 'Cancel' and 'Submit' buttons. In the background, an 'Events History' section is partially visible, showing an 'Info' event and a 'Warning' message.

Centralized Call History - UCM

When users are not signed in Webex app calls placed/received on other devices are not seen. The result is inconsistency across the devices.

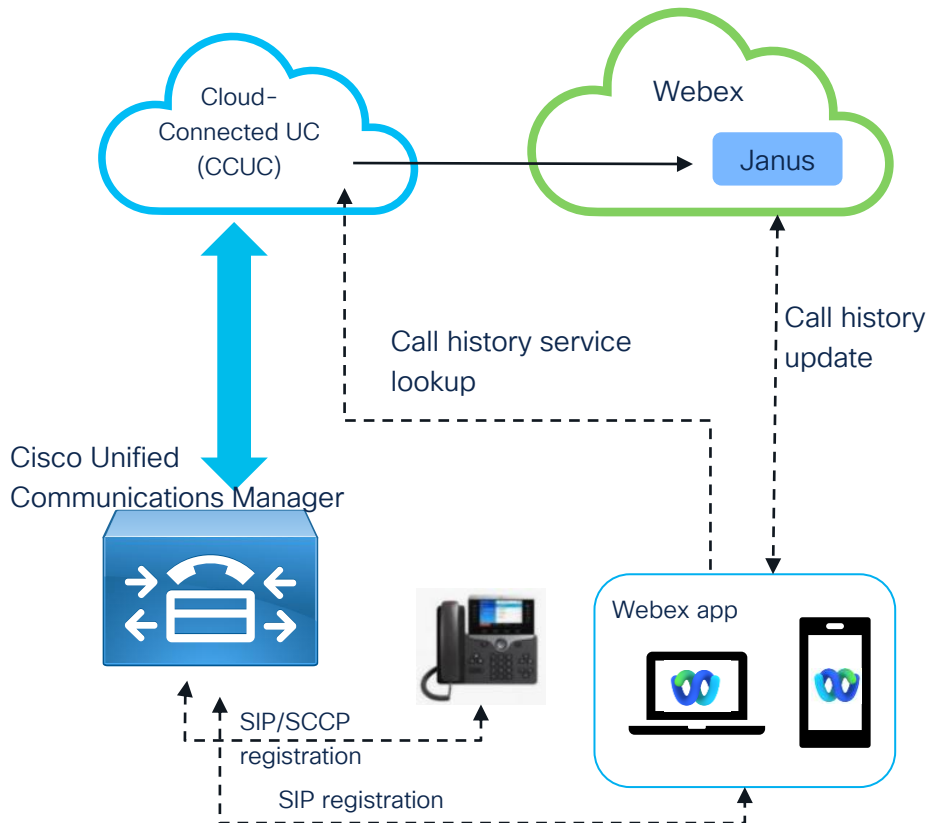

With this feature, users will get synchronized call history on Webex app registered to UCM.

IT admin can turn on required options through CCUC on Control Hub.

Specific Platform releases/dates:
Webex App on Desktop and mobile

Pre-requisite:

- Webex Cloud-Connected UC (CCUC)
- UCM 14 SU4 / 15 SU2
- Webex App 44.6

Borderless CTI

The screenshot displays the Webex Control Hub interface. On the left is a navigation sidebar with categories like Groups, Locations, Workspaces, Devices, Apps, Account, Security, and Organization Settings. The main content area shows the configuration for a 'StandAloneCluster - e4cucm.hcsent4.ciscolat'. A 'Service Management' modal is open in the center, listing various services and their status. The 'Borderless CTI' service is the only one that is 'Enabled', while all others are 'Disabled'. The modal includes a warning that changes will take time to take effect and buttons for 'Cancel' and 'Submit'.

SpeechView Voicemail Transcription - CUC

The screenshot displays the Webex Control Hub interface. A modal window titled "Service Management" is open, showing a list of services and their status. The "Speechview Voicemail Transcript" service is currently enabled, while others are disabled. The background shows the "StandAloneCluster" configuration page with a table of nodes.

Service Management

Changes to these settings will take a short time to take effect.

Directory Service	☐	Disabled
Certificate Management	☐	Disabled
Operational Metrics	☐	Disabled
Voicemail	☐	Disabled
Speechview Voicemail Transcript	☒	Enabled
Deployment Insights	☐	Disabled

Buttons: Cancel, Submit

Background Interface:

- Header: webex Control Hub, AI-powered smart search, user profile.
- Left Sidebar: Reports, MANAGEMENT (Users, Groups, Locations, Workspaces, Devices, Apps, Account, Security, Organization Settings), SERVICES (Updates & Migrations).
- Main Content: StandAloneCluster configuration page.
 - Cluster Group Name
 - Services
 - Table with columns: Node Name ^, Node V. Row: ucba-aricent-vm1.cisco, 14.
- Right Sidebar: Events History, Insights, Events table with columns: Events, Last Connection. Row: 04-23-2025 12:01:57.

Cisco Unity Connection SpeechView – Migration to Webex in-house Transcription Service

With SpeechView, users can receive both voice mail and its transcript in their email. This feature is useful when users cannot listen to voice mail but have access to email.

The 3rd party service used for transcription was shut down in Dec 2024.

Solution:

- Migration of SpeechView transcription service from third party service to Webex in-house transcription service.
- Enable Cisco to continue the service, reduce the complexity of configuring SMTP and leverage the capabilities of Webex.
- Integration through CCUC

Supported Releases:

CUC 14SU4 and 15SU2 onwards

Transcription available for English and specific foreign languages.

CUC

Webex Cloud

Enable CCUC in CH

Cloud-Connected UC: Enable from Control Hub

Existing Control Hub Org

- Enable CCUC from an existing Control Hub Org
- Note this will not appear by default for UCM Cloud or HCS partner/customers

Cloud-Connected UC Standard level

- Analytics dashboards with drill down and reports – historical with up to 13 months included
- Certificate management
- Operations (includes CCUC RTMT)
- Troubleshooting
- Deployment insights

* CCUC Pro level features planned in future

The screenshot displays the Cisco Webex Control Hub admin interface at the URL `admin.webex.com/ccuc-services/enabler`. The left sidebar contains navigation menus for Overview, Monitoring (Organization Health, Analytics, Troubleshooting), Management (Users, Workspaces, Devices, Apps, Account, Organization Settings), Services (Updates, Messaging, Calling, Connected UC, Hybrid), and a Test-CCUCEnableTest3 option. The main content area is titled 'Connected UC' and features the 'Cisco Webex Cloud-Connected UC' heading. Below this, it states: 'Enable Cisco Webex Cloud-Connected Unified Communication and connect your on-premises UC applications (such as UCM and IM&P) to Control Hub.' A prominent blue button labeled 'Enable Connected UC' is visible. To the right is an illustration of a person sitting in a chair, talking on a phone, with a laptop and a cat on a table nearby. At the bottom, there are analytics dashboards and a section titled 'Enhance your deployment with our services like:' which lists 'Deep Insight Analytics' and 'Deployment Insights and more.' A 'Learn more' button is located at the bottom right of this section.

Cloud Connected UC: Flex 3.0 Standalone option

Available globally, except for US federal embargo countries and China

Cloud-Connected UC Standard level	FLEX 3.0 only	CCUC-STD
1. Analytics 2. Operational Metrics a) Operations Dashboard ,Troubleshooting ,Web RTMT 3. Certificate Management 4. Rich Presence for Webex App 5. Borderless CTI 6. Touchless Provisioning for Webex App 7. CCUC Directory Service - Azure AD 8. Microsoft Teams Integration a) Call History,Presence Sync - Webex <-> Microsoft,VoiceMail (CUC) 9. Migration 10. SpeechView Voicemail Transcription	Eligibility: Any customer (including perpetual calling)	Top level Add-on to A-FLEX-3 At \$0 • This could be ordered for CCUC only i.e. no other service options required • When moving your other services to FLEX, cancel this standalone subscription and add it as part of those services.

CCUC: Flex 3.0 ordering details – standalone option

The screenshot displays the Cisco Collaboration Flex Plan 3.0 A-FLEX-3 ordering page. The left sidebar shows the 'Subscription' tab. The main content area is divided into sections: 'Premises and Hosted Software Choices', 'Calling Options and Add-ons', 'Cloud Connected UC', 'Cloud Connected UC Standard Quantity', and 'Teams Add-ons'. The 'Calling Options and Add-ons' section has a list of checkboxes, with 'Cloud Connected UC' selected. The 'Cloud Connected UC' section has two radio buttons, with 'Cloud Connected UC Standard Standalone' selected. The 'Cloud Connected UC Standard Quantity' section has a text input field with '1000' entered. The right sidebar shows the 'Summary' tab with a 'General' section.
